AIAA JOURNAL
Vol. 48, No. 12, December 2010

2010 *AIAA Journal* Index

How to Use the Index

In the Subject Index, pages 2984–2992, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 2993–2995, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2996–3005, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. The Book Review Index is listed on page 3005. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2010, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

J09-068E Erratum on Effect of Tip Vortices in Low-Reynolds-Number Poststall Flow Control
J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators
J10-026 Solitons in Transitional Boundary Layers
J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators
J10-026 Solitons in Transitional Boundary Layers
J10-100 Unifying Perspective for Gappy Proper Orthogonal Decomposition and Probabilistic Principal Component Analysis
J10-022 Experimental Study of Plasma Flow Control on Highly Swept Delta Wing
J10-036 Aerodynamic Optimization Algorithm with Integrated Geometry Parameterization and Mesh Movement
J10-089 Transonic Unsteady Potential Flow: Scaling Analysis of Linear and Nonlinear Dynamics
J10-129 Nonparametric Fitting of Aerodynamic Data Using Smoothing Thin-Plate Splines
J10-141 Treatment of Nonmatched Grids for High-Accuracy Navier–Stokes Solutions
J10-226 Transient Separation Control Using Pulse-Combustion Actuation
J10-051 Bridging the Gap between Pressure-Sensitive Paint and Balance Measurements
J10-133 Numerical Investigation on the Aerodynamics of Oscillating Airfoils with Deployable Gurney Flaps
J10-128 Independent Two-Fields Solution for Full-Potential Unsteady Transonic Flows
J10-266 High-Lift Airfoil Separation with Dielectric Barrier Discharge Plasma Actuation
J10-275 Expression for Supersonic Fluctuating Drag Force Magnitude due to Ambient Thermodynamic Disturbances
J10-263 Extending Weighted Compact Nonlinear Schemes to Complex Grids with Characteristic-Based Interface Conditions
J10-276 Plasma Catalysis for Enhanced-Thrust Single Dielectric Barrier Discharge Plasma Actuators
J10-261 Compressibility Effects on Boundary-Layer Transition Induced by an Isolated Roughness Element
J10-269 Aerodynamics of a Supersonic Projectile in Proximity to a Solid Surface
J10-253 Blockage Effects on the Aerodynamics of a Pitching Wing
J10-262 Influence of Reynolds Number on Vortex Flow over a Nonslender Delta Wing
J10-079 Advanced Unstructured Grid Generation for Complex Aerodynamic Applications
J10-172 Plasma Volumetric Effects on the Force Production of a Plasma Actuator
J10-178 Reduced-Order Model for Viscous Aerodynamic Flow Past an Airfoil
J10-024 Theoretical Modeling of Two-Body Interaction in Supersonic Flow
J10-040 Corrugated Tabs for Supersonic Jet Control
J10-060 Experimental Investigation of Intake Ground Vortices During Takeoff
J10-106 Discrete Adjoint-Based Design Optimization of Unsteady Turbulent Flows on Dynamic Unstructured Grids
J10-107 Effect of Pitch Rate on Near-Surface Topology on a Delta Wing
J10-109 Effects of Flexible Fin on Low-Frequency Oscillation in Post-Stalled Flows
J10-273 Comparing Pure-Pitch and Pure-Plunge Kinematics for a Symmetric Airfoil
J10-116 Improved Drag Correlation for Spheres and Application to Shock-Tube Experiments
J10-037 Intermittent Bursting of a Laminar Separation Bubble on an Airfoil
J10-252 Point-Collocation Nonintrusive Polynomial Chaos Method for Stochastic Computational Fluid Dynamics
J10-234 Induced-Drag Minimization of Nonplanar Geometries Based on the Euler Equations
J10-232 Far-Field Analysis of the Aerodynamic Force by Lamb Vector Integrals
J10-192 Numerical Study of Wind-Tunnel Sidewall Effects on Circulation Control Airfoil Flows
J10-154 Turbulence Modeling for Low-Reynolds-Number Flows
J10-155 Fluidic Control of a Turret Wake: Aerodynamic and Aero-Optical Effects
J10-082 Stochastic Investigation of Flows About Airfoils at Transonic Speeds
J10-086 Comparison of Gradient-Based and Gradient-Enhanced Response-Surface-Based Optimizers
J10-095 Enhancement of Class of Adjoint Design Methods via Optimization of Parameters
J10-203 Applications of Actuator Disk Theory to Membrane Flapping Wings
J10-202 Numerical Simulation on Plasma Circulation Control Airfoil
J10-219 Reduced-Order Nonlinear Unsteady Aerodynamic Modeling Using a Surrogate-Based Recurrence Framework
J10-274 Stability of Gliding Flight of a Swallowtail Butterfly
J10-223 Yaw Angle Effect on Flow Structure over the Nonslender Diamond Wing
J10-250 How Does a Gurney Flap Enhance the Aerodynamics Forces?
J10-222 Experimental Investigation on Aerodynamic Performance of Gliding Butterflies
J10-210 High-Resolution Simulation of Parallel Blade-Vortex Interactions
J10-214 Implicit High-Order Spectral Finite Volume Method for Inviscid Compressible Flows
J10-068 Contrasting the Harmonic Balance and Linearized Methods for Oscillating-Flap Simulations
J10-084 Large-Eddy Simulations and Measurements of a Small-Scale High-Speed Coflowing Jet
J10-162 Large-Eddy Simulation: Current Capabilities, Recommended Practices, and Future Research

Aeroelasticity and Aeroservoelasticity

J10-069 Aeroelastic-Acoustics Simulation of Flight Systems
J10-092 Bifurcation Prediction of Large-Order Aeroelastic Models
J10-191 Flapping Wing Structural Deformation and Thrust Correlation Study with Flexible Membrane Wings

2010 *AIAA Journal* Index

How to Use the Index

In the Subject Index, pages 2984–2992, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 2993–2995, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2996–3005, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. The Book Review Index is listed on page 3005. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2010, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

J09-068E Erratum on Effect of Tip Vortices in Low-Reynolds-Number Poststall Flow Control
J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators
J10-026 Solitons in Transitional Boundary Layers
J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators
J10-026 Solitons in Transitional Boundary Layers
J10-100 Unifying Perspective for Gappy Proper Orthogonal Decomposition and Probabilistic Principal Component Analysis
J10-022 Experimental Study of Plasma Flow Control on Highly Swept Delta Wing
J10-036 Aerodynamic Optimization Algorithm with Integrated Geometry Parameterization and Mesh Movement
J10-089 Transonic Unsteady Potential Flow: Scaling Analysis of Linear and Nonlinear Dynamics
J10-129 Nonparametric Fitting of Aerodynamic Data Using Smoothing Thin-Plate Splines
J10-141 Treatment of Nonmatched Grids for High-Accuracy Navier–Stokes Solutions
J10-226 Transient Separation Control Using Pulse-Combustion Actuation
J10-051 Bridging the Gap between Pressure-Sensitive Paint and Balance Measurements
J10-133 Numerical Investigation on the Aerodynamics of Oscillating Airfoils with Deployable Gurney Flaps
J10-128 Independent Two-Fields Solution for Full-Potential Unsteady Transonic Flows
J10-266 High-Lift Airfoil Separation with Dielectric Barrier Discharge Plasma Actuation
J10-275 Expression for Supersonic Fluctuating Drag Force Magnitude due to Ambient Thermodynamic Disturbances
J10-263 Extending Weighted Compact Nonlinear Schemes to Complex Grids with Characteristic-Based Interface Conditions
J10-276 Plasma Catalysis for Enhanced-Thrust Single Dielectric Barrier Discharge Plasma Actuators
J10-261 Compressibility Effects on Boundary-Layer Transition Induced by an Isolated Roughness Element
J10-269 Aerodynamics of a Supersonic Projectile in Proximity to a Solid Surface
J10-253 Blockage Effects on the Aerodynamics of a Pitching Wing
J10-262 Influence of Reynolds Number on Vortex Flow over a Nonslender Delta Wing
J10-079 Advanced Unstructured Grid Generation for Complex Aerodynamic Applications
J10-172 Plasma Volumetric Effects on the Force Production of a Plasma Actuator
J10-178 Reduced-Order Model for Viscous Aerodynamic Flow Past an Airfoil
J10-024 Theoretical Modeling of Two-Body Interaction in Supersonic Flow
J10-040 Corrugated Tabs for Supersonic Jet Control
J10-060 Experimental Investigation of Intake Ground Vortices During Takeoff
J10-106 Discrete Adjoint-Based Design Optimization of Unsteady Turbulent Flows on Dynamic Unstructured Grids
J10-107 Effect of Pitch Rate on Near-Surface Topology on a Delta Wing
J10-109 Effects of Flexible Fin on Low-Frequency Oscillation in Post-Stalled Flows
J10-273 Comparing Pure-Pitch and Pure-Plunge Kinematics for a Symmetric Airfoil
J10-116 Improved Drag Correlation for Spheres and Application to Shock-Tube Experiments
J10-037 Intermittent Bursting of a Laminar Separation Bubble on an Airfoil
J10-252 Point-Collocation Nonintrusive Polynomial Chaos Method for Stochastic Computational Fluid Dynamics
J10-234 Induced-Drag Minimization of Nonplanar Geometries Based on the Euler Equations
J10-232 Far-Field Analysis of the Aerodynamic Force by Lamb Vector Integrals
J10-192 Numerical Study of Wind-Tunnel Sidewall Effects on Circulation Control Airfoil Flows
J10-154 Turbulence Modeling for Low-Reynolds-Number Flows
J10-155 Fluidic Control of a Turret Wake: Aerodynamic and Aero-Optical Effects
J10-082 Stochastic Investigation of Flows About Airfoils at Transonic Speeds
J10-086 Comparison of Gradient-Based and Gradient-Enhanced Response-Surface-Based Optimizers
J10-095 Enhancement of Class of Adjoint Design Methods via Optimization of Parameters
J10-203 Applications of Actuator Disk Theory to Membrane Flapping Wings
J10-202 Numerical Simulation on Plasma Circulation Control Airfoil
J10-219 Reduced-Order Nonlinear Unsteady Aerodynamic Modeling Using a Surrogate-Based Recurrence Framework
J10-274 Stability of Gliding Flight of a Swallowtail Butterfly
J10-223 Yaw Angle Effect on Flow Structure over the Nonslender Diamond Wing
J10-250 How Does a Gurney Flap Enhance the Aerodynamics Forces?
J10-222 Experimental Investigation on Aerodynamic Performance of Gliding Butterflies
J10-210 High-Resolution Simulation of Parallel Blade-Vortex Interactions
J10-214 Implicit High-Order Spectral Finite Volume Method for Inviscid Compressible Flows
J10-068 Contrasting the Harmonic Balance and Linearized Methods for Oscillating-Flap Simulations
J10-084 Large-Eddy Simulations and Measurements of a Small-Scale High-Speed Coflowing Jet
J10-162 Large-Eddy Simulation: Current Capabilities, Recommended Practices, and Future Research

Aeroelasticity and Aeroservoelasticity

J10-069 Aeroelastic-Acoustics Simulation of Flight Systems
J10-092 Bifurcation Prediction of Large-Order Aeroelastic Models
J10-191 Flapping Wing Structural Deformation and Thrust Correlation Study with Flexible Membrane Wings

J10-089 Transonic Unsteady Potential Flow: Scaling Analysis of Linear and Nonlinear Dynamics
J10-006 Finite Element Method Applied to Supersonic Flutter of Circular Cylindrical Shells
J10-185 Towards Real-Time Computational-Fluid-Dynamics-Based Aeroelastic Computations Using a Database of Reduced-Order Information
J10-199 Nonlinear Aeroelastic Study for Folding Wing Structures
J10-128 Independent Two-Fields Solution for Full-Potential Unsteady Transonic Flows
J10-219 Reduced-Order Nonlinear Unsteady Aerodynamic Modeling Using a Surrogate-Based Recurrence Framework
J10-242 Structural and Aerodynamic Models in Nonlinear Flight Dynamics of Very Flexible Aircraft
J10-038 Aeroelastic Airfoil with Free Play at Angle of Attack with Gust Excitation
J10-158 Studies on Fluid-Thermal-Structural Coupling for Aerothermoelasticity in Hypersonic Flow
J10-225 Harmonic-Balance-Based Code-Coupling Algorithm for Aeroelastic Systems Subjected to Forced Excitation
J10-220 Gust Response for Flexibly Suspended High-Aspect Ratio Wings

Airframe-Propulsion Integration

J10-060 Experimental Investigation of Intake Ground Vortices During Takeoff
J10-031 Jet Entrainment Theory for Vertical Takeoff and Landing Aircraft Suckdown

Configuration Design

J10-087 Comparison of Surrogate Models in a Multidisciplinary Optimization Framework for Wing Design
J10-166 Geometry Parameterization and Computational Mesh Deformation by Physics-Based Direct Manipulation Approaches

Flight Control Integration

J10-050 Dynamic Elastic-Axis Shifting: An Important Enhancement of Piezoelectric Post-buckled Precompressed Actuators

Flight Mechanics

J10-129 Nonparametric Fitting of Aerodynamic Data Using Smoothing Thin-Plate Splines

Flow Control

J09-068E Erratum on Effect of Tip Vortices in Low-Reynolds-Number Poststall Flow Control
J10-035 Extremizing Feedback Control of a High-Speed and High Reynolds Number Jet
J10-022 Experimental Study of Plasma Flow Control on Highly Swept Delta Wing
J10-053 Experimental Investigation of Flow Separation Control Using an Array of Synthetic Jets
J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators
J10-098 Compressible Large-Eddy Simulation of Separation Control on a Wall-Mounted Hump
J10-147 Numerical Simulation of Low-Pressure Turbine Blade Separation Control
J10-226 Transient Separation Control Using Pulse-Combustion Actuation
J10-276 Plasma Catalysis for Enhanced-Thrust Single Dielectric Barrier Discharge Plasma Actuators
J10-266 High-Lift Airfoil Separation with Dielectric Barrier Discharge Plasma Actuation
J10-259 Large-Eddy Simulation of Plasma-Based Turbulent Boundary-Layer Separation Control
J10-172 Plasma Volumetric Effects on the Force Production of a Plasma Actuator
J10-174 Active Flow Control for NACA 6-Series Airfoil at Re = 64,200
J10-197 Impact of Harmonic Perturbations on a Turbulent Mixing Layer
J10-231 Microramp Flow Control of Normal Shock/Boundary-Layer Interactions
J10-016 Control of Separation Using Spanwise Periodic Porosity
J10-109 Effects of Flexible Fin on Low-Frequency Oscillation in Post-Stalled Flows
J10-149 Turbulent Boundary-Layer Separation Control with Single Dielectric Barrier Discharge Plasma Actuators
J10-169 Feedback Control of Boundary-Layer Bypass Transition: Comparison of Simulations with Experiments
J10-155 Fluidic Control of a Turret Wake: Aerodynamic and Aero-Optical Effects
J10-237 Large Eddy Simulation and Experimental Study of a Controlled Coaxial Liquid-Air Jet
J10-216 High-Bandwidth Pulsed Microactuators for High-Speed Flow Control
J10-202 Numerical Simulation on Plasma Circulation Control Airfoil
J10-028 Characterization of a High-Frequency Pulsed-Plasma Jet Actuator for Supersonic Flow Control
J10-163 Lift Enhancement for Low-Aspect-Ratio Wings with Periodic Excitation
J10-258 High-Order Numerical Method for Magnetohydrodynamic Control of Shock-Induced Separation

Micro Air Vehicles

J09-068E Erratum on Effect of Tip Vortices in Low-Reynolds-Number Poststall Flow Control
J10-191 Flapping Wing Structural Deformation and Thrust Correlation Study with Flexible Membrane Wings
J10-253 Blockage Effects on the Aerodynamics of a Pitching Wing
J10-268 Numerical Study of Flexible Flapping Wing Propulsion
J10-076 Effect of Wing Flexibility on Lift and Thrust Production in Flapping Flight
J10-273 Comparing Pure-Pitch and Pure-Plunge Kinematics for a Symmetric Airfoil
J10-113 Pitch, Roll, and Yaw Damping of a Flapping Wing
J10-107 Effect of Pitch Rate on Near-Surface Topology on a Delta Wing
J10-163 Lift Enhancement for Low-Aspect-Ratio Wings with Periodic Excitation
J10-222 Experimental Investigation on Aerodynamic Performance of Gliding Butterflies
J10-274 Stability of Gliding Flight of a Swallowtail Butterfly

Military Missions

J10-187 Effect of Frontal Gusts on Forward Flapping Flight

Noise

J10-002 Characteristics of the Shock Noise Component of Jet Noise
J10-119 Using Reynolds-Averaged Navier–Stokes Calculations to Predict Trailing-Edge Noise
J10-035 Extremizing Feedback Control of a High-Speed and High Reynolds Number Jet
J10-077 Sound Transmission from a Source Outside a Nonisothermal Boundary Layer
J10-085 Effect of Centerbody Scattering on Advanced Open-Rotor Noise
J10-121 Jet Noise: Acoustic Analogy Informed by Large Eddy Simulation
J10-248 Observer for Phased Microphone Array Signal Processing with Nonlinear Output
J10-112 Near-Field Acoustic Characteristics of a Turbulent Axisymmetric Pulsed Jet
J10-081 Numerical Study of Acoustic Installation Effects with a Computational Aeroacoustics Method
J10-210 High-Resolution Simulation of Parallel Blade-Vortex Interactions
J10-215 Simple Technique for Precise Measurement of Transmission Loss of Planar Sound Waves
J10-127 Evaluation of the RPM Approach for the Simulation of Broadband Combustion Noise

Rotorcraft

J10-133 Numerical Investigation on the Aerodynamics of Oscillating Airfoils with Deployable Gurney Flaps
J10-129 Nonparametric Fitting of Aerodynamic Data Using Smoothing Thin-Plate Splines
J10-210 High-Resolution Simulation of Parallel Blade-Vortex Interactions
J10-032 Active Vibration Control of Flexible Rotors on Maneuvering Vehicles
J10-195 Efficient Adaptive Cartesian Vorticity Transport Solver for Vortex-Dominated Flows

Simulation

J10-225 Harmonic-Balance-Based Code-Coupling Algorithm for Aeroelastic Systems Subjected to Forced Excitation

STOL/VTOL/STOVL

J10-202 Numerical Simulation on Plasma Circulation Control Airfoil
J10-031 Jet Entrainment Theory for Vertical Takeoff and Landing Aircraft Suckdown

Structural Design (Including Loads)

J10-242 Structural and Aerodynamic Models in Nonlinear Flight Dynamics of Very Flexible Aircraft
J10-271 Analytical Investigation of the Toughening Potential of a Failure Tailoring Concept
J10-125 Generalized Galerkin Method for Modal Testing of Structure with Pseudomaterials

Structural Materials

J10-043 New Interference Approach for Ballistic Impact into Stacked Flexible Composite Body Armor

Testing, Flight and Ground

J10-051 Bridging the Gap between Pressure-Sensitive Paint and Balance Measurements
J10-125 Generalized Galerkin Method for Modal Testing of Structure with Pseudomaterials

J10-245 Mass Flux Sensing via Tunable Diode Laser Absorption of Water Vapor
J10-215 Simple Technique for Precise Measurement of Transmission Loss of Planar Sound Waves
J10-248 Observer for Phased Microphone Array Signal Processing with Nonlinear Output

Vibration

J10-130 Finite Element Model Updating Using Frequency Response Function of Incomplete Strain Data
J10-034 Automatic Balancing of Bladed-Disk/Shaft System via Passive Autobalancer Devices
J10-052 Adaptive Snubber-Type Magnetorheological Fluid-Elastomeric Helicopter Lag Damper
J10-064 Fluid–Structure–Acoustic Interaction of the Flow Past a Thin Flexible Structure
J10-125 Generalized Galerkin Method for Modal Testing of Structure with Pseudomaterials

ENERGY

Alternate Fuels

J10-030 Burning Velocities of Alternative Gaseous Fuels at Elevated Temperature and Pressure

Wind Power

J10-249 Proposed Boundary Conditions for Gust–Airfoil Interaction Noise
J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

J10-032 Active Vibration Control of Flexible Rotors on Maneuvering Vehicles

FLUID DYNAMICS

Aeroacoustics

J09-105E Erratum on Role of Jet Temperature in Correlating Jet Noise
J10-062 Aeroacoustics of Drag-Generating Swirling Exhaust Flows
J10-035 Extremizing Feedback Control of a High-Speed and High Reynolds Number Jet
J10-069 Aeroelastic-Acoustics Simulation of Flight Systems
J10-134 Microphone-Array Measurements in a Cryogenic Wind Tunnel
J10-018 Excess Broadband Noise Observed with Overexpanded Jets
J10-002 Characteristics of the Shock Noise Component of Jet Noise
J10-124 Acoustic Resonance in a Model Ducted-Jet System
J10-137 Effect of Velocity Ratio on Noise Source Distribution of Coaxial Jets
J10-085 Effect of Centerbody Scattering on Advanced Open-Rotor Noise
J10-110 Computational Analysis of Mach Number Effects on the Edgetone Phenomenon
J10-121 Jet Noise: Acoustic Analogy Informed by Large Eddy Simulation
J10-029 Prediction of Sound Generated by Complex Flows at Low Mach Numbers
J10-077 Sound Transmission from a Source Outside a Nonisothermal Boundary Layer
J10-094 Finite Difference Lattice Boltzmann Method for Compressible Thermal Fluids
J10-186 Towards Numerical Simulation of Fan Broadband Noise Aft Radiation from Aeroengines
J10-196 DAMAS2 Using a Point-Spread Function Weakly Varying in Space
J10-270 Prediction of Broadband Shock-Associated Noise Using Reynolds-Averaged Navier–Stokes Computational Fluid Dynamics
J10-221 Beamformed Flow-Acoustic Correlations in a Supersonic Jet
J10-182 Computation of Wall Pressure Spectra from Steady Flow Data for Noise Prediction
J10-206 Simultaneous Particle Image Velocimetry and Microphone Array Measurements on a Rod-Airfoil Configuration
J10-042 Curved Boundary Treatments for the Discontinuous Galerkin Method Applied to Aeroacoustic Propagation
J10-064 Fluid–Structure–Acoustic Interaction of the Flow Past a Thin Flexible Structure
J10-205 Computation of High-Speed Coaxial Jets with Fan Flow Deflection
J10-081 Numerical Study of Acoustic Installation Effects with a Computational Aeroacoustics Method
J10-074 Frequency-Domain Linearized Euler Model for Turbomachinery Noise Radiation Through Engine Exhaust
J10-025 Acoustic Properties of Porous Coatings for Hypersonic Boundary-Layer Control
J10-267 Validation of a Zonal Approach Computing the Sound Radiation from Lined Ducts
J10-038 Aeroelastic Airfoil with Free Play at Angle of Attack with Gust Excitation
J10-033 Finite Difference Lattice Boltzmann Method Applied to Acoustic-Scattering Problems
J10-229 Patched Characteristic Interface Condition for High-Order Multiblock Aeroacoustic Computation
J10-249 Proposed Boundary Conditions for Gust–Airfoil Interaction Noise
J10-236 Improved Algorithm for Nonlinear Sound Propagation with Aircraft and Helicopter Noise Applications
J10-083 Rotating Blade Trailing-Edge Noise: Experimental Validation of Analytical Model
J10-119 Using Reynolds-Averaged Navier–Stokes Calculations to Predict Trailing-Edge Noise
J10-207 Acoustic Analogy Formulations Accelerated by Fast Multipole Method for Two-Dimensional Aeroacoustic Problems
J10-217 Surface-Pressure Fluctuations from Separated Flow over an Axisymmetric Bump
J10-209 Acoustic Source Identification for Transitional Airfoil Flows Using Cross Correlations
J10-244 Broadband Noise Due to Rotor-Wake/Rotor Interaction in Contra-Rotating Open Rotors
J10-044 Vortex Shedding and Noise Radiation from a Slat Trailing Edge
J10-084 Large-Eddy Simulations and Measurements of a Small-Scale High-Speed Coflowing Jet
J10-257 Acoustic Scattering in the Time Domain Using an Equivalent Source Method

Boundary Layers and Heat Transfer-Laminar

J10-258 High-Order Numerical Method for Magnetohydrodynamic Control of Shock-Induced Separation
J10-165 Aerothermodynamics Behind a Blunt Body at Superorbital Speeds
J10-073 Critical Study of Agglomerated Multigrid Methods for Diffusion

Boundary Layers and Heat Transfer-Turbulent

J10-023 Verification of the Clauser Technique in Predicting Wall Shear Stress
J10-008 Numerical Simulations of Effects of Micro Vortex Generators Using Immersed-Boundary Methods
J10-009 Microramps Upstream of an Oblique-Shock/Boundary-Layer Interaction
J10-275 Expression for Supersonic Fluctuating Drag Force Magnitude due to Ambient Thermodynamic Disturbances
J10-259 Large-Eddy Simulation of Plasma-Based Turbulent Boundary-Layer Separation Control
J10-161 Vortex Filament Simulation of the Turbulent Boundary Layer
J10-217 Surface-Pressure Fluctuations from Separated Flow over an Axisymmetric Bump
J10-149 Turbulent Boundary-Layer Separation Control with Single Dielectric Barrier Discharge Plasma Actuators
J10-231 Microramp Flow Control of Normal Shock/Boundary-Layer Interactions

Boundary-Layer Stability and Transition

J10-161 Vortex Filament Simulation of the Turbulent Boundary Layer
J10-026 Solitons in Transitional Boundary Layers
J10-025 Acoustic Properties of Porous Coatings for Hypersonic Boundary-Layer Control
J10-179 Experimental and Numerical Fluid-Structure Analysis of Rigid and Flexible Flapping Airfoils
J10-261 Compressibility Effects on Boundary-Layer Transition Induced by an Isolated Roughness Element
J10-169 Feedback Control of Boundary-Layer Bypass Transition: Comparison of Simulations with Experiments
J10-227 Klebanoff-Mode Modeling and Bypass-Transition Prediction
J10-105 Boundary-Layer Transition on Broad Cones Rotating in an Imposed Axial Flow
J10-044 Vortex Shedding and Noise Radiation from a Slat Trailing Edge
J10-243 Direct Numerical Simulation of Discrete Roughness on a Swept-Wing Leading Edge
J10-096 Investigation of the Taylor–Culick Flow Through Particle Image Velocimetry and Numerical Simulation

Computational Fluid Dynamics

J10-092 Bifurcation Prediction of Large-Order Aeroelastic Models
J10-036 Aerodynamic Optimization Algorithm with Integrated Geometry Parameterization and Mesh Movement

J10-048 Hybrid Reynolds-Averaged/Large-Eddy Simulations of a Coaxial Supersonic Freejet Experiment
J10-015 Simulation of Supersonic Combustion Involving H_2/Air and C_2H_4/Air
J10-017 Computations of Flapping Flow Propulsion for Unmanned Underwater Vehicle Design
J10-031 Jet Entrainment Theory for Vertical Takeoff and Landing Aircraft Suckdown
J10-009 Microramps Upstream of an Oblique-Shock/Boundary-Layer Interaction
J10-147 Numerical Simulation of Low-Pressure Turbine Blade Separation Control
J10-008 Numerical Simulations of Effects of Micro Vortex Generators Using Immersed-Boundary Methods
J10-046 Simulation of Turbulent Mixing Behind a Strut Injector in Supersonic Flow
J10-138 Simulation of Sandia Flame D Using Velocity-Scalar Filtered Density Function
J10-140 Assessment of Bhatnagar–Gross–Krook Approaches for Near Continuum Regime Nozzle Flows
J10-141 Treatment of Nonmatched Grids for High-Accuracy Navier–Stokes Solutions
J10-187 Effect of Frontal Gusts on Forward Flapping Flight
J10-166 Geometry Parameterization and Computational Mesh Deformation by Physics-Based Direct Manipulation Approaches
J10-132 Large-Eddy/Reynolds-Averaged Navier–Stokes Simulations of Sonic Injection into Mach 2 Crossflow
J10-161 Vortex Filament Simulation of the Turbulent Boundary Layer
J10-142 Effect of Shock-Capturing Errors on Turbulence Statistics
J10-193 Large-Eddy Simulation of Supercritical-Pressure Round Jets
J10-110 Computational Analysis of Mach Number Effects on the Edgetone Phenomenon
J10-124 Acoustic Resonance in a Model Ducted-Jet System
J10-133 Numerical Investigation on the Aerodynamics of Oscillating Airfoils with Deployable Gurney Flaps
J10-086 Comparison of Gradient-Based and Gradient-Enhanced Response-Surface-Based Optimizers
J10-122 Comparison of Node-Centered and Cell-Centered Unstructured Finite-Volume Discretizations: Viscous Fluxes
J10-098 Compressible Large-Eddy Simulation of Separation Control on a Wall-Mounted Hump
J10-094 Finite Difference Lattice Boltzmann Method for Compressible Thermal Fluids
J10-076 Effect of Wing Flexibility on Lift and Thrust Production in Flapping Flight
J10-091 Validation Studies of Fully Implicit, Parallel Finite Element Simulations of Laminar Hypersonic Flows
J10-056 Nearly All-Speed, Stabilized Time-Accurate Upwind Scheme on Unstructured Grid
J10-066 Evaluation of Euler Fluxes for Hypersonic Heating Computations
J10-101 Robust Cartesian Grid Flow Solver for High-Reynolds-Number Turbulent Flow Simulations
J10-259 Large-Eddy Simulation of Plasma-Based Turbulent Boundary-Layer Separation Control
J10-268 Numerical Study of Flexible Flapping Wing Propulsion
J10-029 Prediction of Sound Generated by Complex Flows at Low Mach Numbers
J10-265 Adjoint Sensitivity Formulation for Discontinuous Galerkin Discretizations in Unsteady Inviscid Flow Problems
J10-269 Aerodynamics of a Supersonic Projectile in Proximity to a Solid Surface
J10-263 Extending Weighted Compact Nonlinear Schemes to Complex Grids with Characteristic-Based Interface Conditions
J10-174 Active Flow Control for NACA 6-Series Airfoil at Re = 64,200
J10-183 Optimizing a Boundary-Layer-Ingestion Offset Inlet by Discrete Adjoint Approach
J10-256 Shock-Water Column Interaction, from Initial Impact to Fragmentation Onset
J10-195 Efficient Adaptive Cartesian Vorticity Transport Solver for Vortex-Dominated Flows
J10-177 Validation of an Output-Adaptive, Tetrahedral Cut-Cell Method for Sonic Boom Prediction
J10-182 Computation of Wall Pressure Spectra from Steady Flow Data for Noise Prediction
J10-188 Large-Eddy Simulation of Jet Mixing in Supersonic Crossflows
J10-213 Comparison of Nonreflecting Outlet Boundary Conditions for Compressible Solvers on Unstructured Grids
J10-185 Towards Real-Time Computational-Fluid-Dynamics-Based Aeroelastic Computations Using a Database of Reduced-Order Information
J10-070 Unstructured-Grid Third-Order Finite Volume Discretization Using a Multistep Quadratic Data-Reconstruction Method
J10-079 Advanced Unstructured Grid Generation for Complex Aerodynamic Applications
J10-093 Numerical Investigation of Transverse Hydrogen Jet into Supersonic Crossflow Using Detached-Eddy Simulation
J10-106 Discrete Adjoint-Based Design Optimization of Unsteady Turbulent Flows on Dynamic Unstructured Grids
J10-108 Simulations of Vortex Formation Around a Blunt Wing Tip
J10-001 Using Automatic Differentiation to Create a Nonlinear Reduced-Order-Model Aerodynamic Solver
J10-049 Three-Dimensional Analysis of a Supersonic Combustor Coupled to Innovative Inward-Turning Inlets

Chronological Index

J09-068E Erratum on Effect of Tip Vortices in Low-Reynolds-Number Poststall Flow Control. Kunihiko Taira and Tim Colonius, *California Institute of Technology* (**48**, 3, p. 702) Erratum

J09-105E Erratum on Role of Jet Temperature in Correlating Jet Noise. K. Viswanathan and M. J. Czech, *The Boeing Company* (**48**, 1, p. 510) Erratum

J10-001 Using Automatic Differentiation to Create a Nonlinear Reduced-Order-Model Aerodynamic Solver. Jeffrey P. Thomas, Earl H. Dowell, and Kenneth C. Hall, *Duke University* (**48**, 1, p. 19) Article based on AIAA Paper 2006-7115

J10-002 Characteristics of the Shock Noise Component of Jet Noise. K. Viswanathan, M. B. Alkislar, and M. J. Czech, *The Boeing Company* (**48**, 1, p. 25) Article based on AIAA Paper 2008-2835

J10-003 Reduced-Order Models for a Shallow Curved Beam Under Combined Loading. Stephen M. Spottswood, Joseph J. Hollkamp, and Thomas G. Eason, *U.S. Air Force Research Laboratory* (**48**, 1, p. 47) Article based on AIAA Paper 2008-2235

J10-004 Application of Multi-Input Volterra Theory to Nonlinear Multi-Degree-of-Freedom Aerodynamic Systems. Maciej Balajewicz, *Duke University*; Fred Nitzsche, and Daniel Feszty, *Carleton University*, Canada (**48**, 1, p. 56) Article based on AIAA Paper 2008-2324

J10-005 Multi-Axial Fatigue-Life Prediction via a Strain-Energy Method. Onome Scott-Emuakpor, Tommy George, and Charles Cross, *U.S. Air Force Research Laboratory*; and M.-H. H. Shen, *Ohio State University* (**48**, 1, p. 63) Article

J10-006 Finite Element Method Applied to Supersonic Flutter of Circular Cylindrical Shells. Farhad Sabri and Aouni A. Lakis, *École Polytechnique de Montréal*, Canada (**48**, 1, p. 73) Article

J10-007 Reliability Analysis for Multidisciplinary Systems with Random and Interval Variables. Jia Guo and Xiaoping Du, *Missouri University of Science and Technology* (**48**, 1, p. 82) Article based on AIAA Paper 2008-1984

J10-008 Numerical Simulations of Effects of Micro Vortex Generators Using Immersed-Boundary Methods. Santanu Ghosh, Jung-Il Choi, and Jack R. Edwards, *North Carolina State University* (**48**, 1, p. 92) Article based on AIAA Paper 2008-3728

J10-009 Microramps Upstream of an Oblique-Shock/Boundary-Layer Interaction. S. Lee, *University of Illinois at Urbana-Champaign*; M. K. Goettke, *U.S. Air Force Research Laboratory*; E. Loth, *University of Illinois at Urbana-Champaign*; J. Tinapple and John Benek, *U.S. Air Force Research Laboratory* (**48**, 1, p. 104) Article based on AIAA Paper 2007-3916

J10-010 Thermal Force and Moment Determination of an Integrated Thermal Protection System. Oscar A. Martinez, Anurag Sharma, Bhavani V. Sankar, and Raphael T. Haftka, *University of Florida*; and Max L. Blosser, *NASA Langley Research Center* (**48**, 1, p. 119) Article

J10-011 Redundant Reactions of Indeterminate Beams by Principle of Quasi Work. I. K. Panditta and R. Ambardhar, *National Institute of Technology Srinagar*, India; and N J. Dembi, *Lingayas Institute of Management and Technology*, India (**48**, 1, p. 129) Article

J10-012 Optimization of Variable-Stiffness Panels for Maximum Buckling Load Using Lamination Parameters. Samuel T. IJsselmuiden, Mostafa M. Abdalla, and Zafer Gürdal, *Delft University of Technology*, The Netherlands (**48**, 1, p. 134) Article based on AIAA Paper 2008-2123

J10-013 Piezoelectric Control of a Partially Propped Cantilever Subjected to a Follower Force. Sunjung Kim and Srinivasan Sridharan, *Washington University in St. Louis* (**48**, 1, p. 144) Article

J10-014 Subatmospheric Extinction of Opposed-Jet Diffusion Flames of Jet Fuel and Its Surrogates. Srinivasan Dattarajan, Okjoo Park, Elizabeth M. Fisher, and Frederick C. Gouldin, *Cornell University*; and Joseph W. Bozzelli, *New Jersey Institute of Technology* (**48**, 1, p. 158) Article

J10-015 Simulation of Supersonic Combustion Involving H_2/Air and C_2H_4/Air. Patrick G. Keistler and H. A. Hassan, *North Carolina State University* (**48**, 1, p. 166) Article based on AIAA Paper 2009-0028

J10-016 Control of Separation Using Spanwise Periodic Porosity. S. K. Patil, *Mercury Marine*; and T. Terry Ng, *University of Toledo* (**48**, 1, p. 174) Article based on AIAA Paper 2006-1410

J10-017 Computations of Flapping Flow Propulsion for Unmanned Underwater Vehicle Design. Ravi Ramamurti, Jason Geder, John Palmisano, and Banahalli Ratna, *U.S. Naval Research Laboratory*; and William C. Sandberg, *Science Applications International Corporation* (**48**, 1, p. 188) Article based on AIAA Paper 2009-724

J10-018 Excess Broadband Noise Observed with Overexpanded Jets. K. B. Zaman, James E. Bridges, and C. A. Brown, *NASA John H. Glenn Research Center at Lewis Field* (**48**, 1, p. 202) Article based on AIAA Paper 2009-0289

J10-019 Mixed-Variable Optimization Strategy Employing Multifidelity Simulation and Surrogate Models. Gulshan Singh, *University of Texas at San Antonio*; and Ramana V. Grandhi, *Wright State University* (**48**, 1, p. 215) Article based on AIAA Paper 2008-5838

J10-020 Flame Stabilization in Small Cavities. Alejandro M. Briones, *University of Dayton Research Institute*; Joseph Zelina, *U.S. Air Force Research Laboratory*; and Viswanath R. Katta, *Innovative Scientific Solutions, Inc.* (**48**, 1, p. 224) Article

J10-021 Laminar Near Wake of a Circular Cylinder at Hypersonic Speeds. Gisu Park, Sudhir L. Gai, and Andrew J. Neely, *University of New South Wales, Australian Defence Force Academy*, Australia (**48**, 1, p. 236) Article

J10-022 Experimental Study of Plasma Flow Control on Highly Swept Delta Wing. P. F. Zhang, J. J. Wang, L. H. Feng, and G. B. Wang, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 1, p. 249) Technical Note

J10-023 Verification of the Clauser Technique in Predicting Wall Shear Stress. Kalyanjit Ghosh and R. J. Goldstein, *University of Minnesota* (**48**, 1, p. 252) Technical Note

J10-024 Theoretical Modeling of Two-Body Interaction in Supersonic Flow. Alexander V. Fedorov and Vitaly G. Soudakov, *Moscow Institute of Physics and Technology*, Russia; and Norman D. Malmuth, *Teledyne Scientific and Imaging* (**48**, 2, p. 258) Article based on AIAA Paper 2008-4341

J10-025 Acoustic Properties of Porous Coatings for Hypersonic Boundary-Layer Control. Guillaume A. Brés and Tim Colonius, *California Institute of Technology*; and Alexander V. Fedorov, *Moscow Institute of Physics and Technology*, Russia (**48**, 2, p. 267) Article based on AIAA Paper 2008-3903

J10-026 Solitons in Transitional Boundary Layers. Oleg S. Ryzhov, *Rensselaer Polytechnic Institute* (**48**, 2, p. 275) Article based on AIAA Paper TFM-4339

J10-027 Deriving Features of Reacting Hypersonic Flow from Gradients at a Curved Shock. H. G. Hornung, *California Institute of Technology* (**48**, 2, p. 287) Article based on AIAA Paper 2008-4340

J10-028 Characterization of a High-Frequency Pulsed-Plasma Jet Actuator for Supersonic Flow Control. Venkateswaran Narayanaswamy, Laxminarayan L. Raja, and Noel T. Clemens, *University of Texas at Austin* (**48**, 2, p. 297) Article

J10-029 Prediction of Sound Generated by Complex Flows at Low Mach Numbers. Yaser Khalighi, Ali Mani, Frank Ham, and Parviz Moin, *Stanford University* (**48**, 2, p. 306) Article

J10-030 Burning Velocities of Alternative Gaseous Fuels at Elevated Temperature and Pressure. A. Bagdanavicius, P. J. Bowen, N. Syred, P. Kay, and A. Crayford, *Cardiff University*, Great Britain; G. Sims and J. Wood, *QinetiQ*, Great Britain (**48**, 2, p. 317) Article based on AIAA Paper 2009-0229

J10-031 Jet Entrainment Theory for Vertical Takeoff and Landing Aircraft Suckdown. Paul Bevilaqua, Richard Margason, and Charles Gaharan, *Lockheed Martin Aeronautics Company* (**48**, 2, p. 330) Article based on AIAA Paper 2007-1397

J10-032 Active Vibration Control of Flexible Rotors on Maneuvering Vehicles. A. S. Das, *National Institute of Technology Rourkela*, India; J. K. Dutt, *Indian Institute of Technology Delhi*, India; and K. Ray, *Indian Institute of Technology Kharagpur*, India (**48**, 2, p. 340) Article

J10-033 Finite Difference Lattice Boltzmann Method Applied to Acoustic-Scattering Problems. E. W. S. Kam, R. M. C. So, S. C. Fu, and R. C. K. Leung, *Hong Kong Polytechnic University*, Hong Kong (PRC) (**48**, 2, p. 354) Article

J10-034 Automatic Balancing of Bladed-Disk/Shaft System via Passive Autobalancer Devices. H. A. DeSmidt, *University of Tennessee* (**48**, 2, p. 372) Article based on AIAA Paper 2008-2334

J10-035 Extremizing Feedback Control of a High-Speed and High Reynolds Number Jet. Aniruddha Sinha, Kihwan Kim, Jin-Hwa Kim, Andrea Serrani, and Mo Samimy, *Ohio State University* (**48**, 2, p. 387) Article based on AIAA Paper 2009-0849

J10-036 Aerodynamic Optimization Algorithm with Integrated Geometry Parameterization and Mesh Movement. Jason E. Hicken and David W. Zingg, *University of Toronto*, Canada (**48**, 2, p. 400) Article based on AIAA Paper 2008-6079

J10-037 Intermittent Bursting of a Laminar Separation Bubble on an Airfoil. Jaber H. Almutairi, Lloyd E. Jones, and Neil D. Sandham, *University of Southampton*, Great Britain (**48**, 2, p. 414) Article

J10-038 Aeroelastic Airfoil with Free Play at Angle of Attack with Gust Excitation. Deman Tang and Earl H. Dowell, *Duke University* (**48**, 2, p. 427) Article

J10-039 Scalar Spatial Correlations in a Supersonic Mixing Flowfield. Hidemi Takahashi, Hiroki Oso, Toshinori Kouchi, and Goro Masuya, *Tohoku University*, Japan; and Mitsutomo Hirota, *Muroran Institute of Technology*, Japan (**48**, 2, p. 443) Article based on AIAA Paper 2009-23

J10-040 Corrugated Tabs for Supersonic Jet Control. B. Chiranjeevi Phanindra and E. Rathakrishnan, *Indian Institute of Technology*, India (**48**, 2, p. 453) Article

J10-041 Effect of Cell Geometry on the Energy Absorption of Honeycombs Under In-Plane Compression. Bilim Atli-Veltin, *Pennsylvania State University*, The Netherlands; and Farhan Gandhi, *Pennsylvania State University* (**48**, 2, p. 466) Article based on AIAA Paper 2008-1881

J10-042 Curved Boundary Treatments for the Discontinuous Galerkin Method Applied to Aeroacoustic Propagation. Thomas Toulorge and Wim Desmet, *Katholieke Universiteit Leuven*, Belgium (**48**, 2, p. 479) Article based on AIAA Paper 2009-3176

J10-043 New Interference Approach for Ballistic Impact into Stacked Flexible Composite Body Armor. S. Leigh Phoenix and A. Kadir Yavuz, *Cornell University*; and Pankaj K. Porwal, *Indian Institute Of Technology*, India (**48**, 2, p. 490) Article based on AIAA Paper 2009-2669

J10-044 Vortex Shedding and Noise Radiation from a Slat Trailing Edge. Sanehiro Makiya, Ayumu Inasawa, and Masahito Asai, *Tokyo Metropolitan University*, Japan (**48**, 2, p. 502) Article

J10-045 Physics and Regimes of Supersonic Combustion. Antonella Ingenito and Claudio Bruno, *University of Rome "La Sapienza,"* Italy (**48**, 3, p. 515) Article based on AIAA Paper 2009-812

J10-046 Simulation of Turbulent Mixing Behind a Strut Injector in Supersonic Flow. Franklin Génin and Suresh Menon, *Georgia Institute of Technology* (**48**, 3, p. 526) Article based on AIAA Paper 2009-132

J10-047 Finite Rate Chemistry Large-Eddy Simulation of Self-Ignition in Supersonic Combustion Ramjet. M. Berglund, E. Fedina, C. Fureby, and J. Tegnér, *Swedish Defence Research Agency*, Sweden; and V. Sabel'nikov, *ONERA*, France (**48**, 3, p. 540) Article

J10-048 Hybrid Reynolds-Averaged/Large-Eddy Simulations of a Coaxial Supersonic Freejet Experiment. R. A. Baurle, *NASA Langley Research Center*; and J. R. Edwards, *North Carolina State University* (**48**, 3, p. 551) Article based on AIAA Paper 2009-129

J10-049 Three-Dimensional Analysis of a Supersonic Combustor Coupled to Innovative Inward-Turning Inlets. Faure J. Malo-Molina and Datta V. Gaitonde, *U.S. Air Force Research Laboratory*; Houshang B. Ebrahimi, *Flow Modeling and Simulation, LLC*; and Stephen M. Ruffin, *Georgia Institute of Technology* (**48**, 3, p. 572) Article based on AIAA Paper 2009-131

J10-050 Dynamic Elastic-Axis Shifting: An Important Enhancement of Piezoelectric Postbuckled Precompressed Actuators. , Roelof Vos and Ron Barrett, *University of Kansas* (**48**, 3, p. 583) Article

J10-051 Bridging the Gap between Pressure-Sensitive Paint and Balance Measurements. Wim Ruyten, *Euclidean Optics, Inc.*; and James H. Bell, *NASA Ames Research Center* (**48**, 3, p. 591) Article based on AIAA Paper 2008-0843

J10-052 Adaptive Snubber-Type Magnetorheological Fluid-Elastomeric Helicopter Lag Damper. Grum T. Ngatu, Wei Hu, and Norman M. Wereley, *University of Maryland*; and Curt S. Kothera, *Techno-Sciences, Inc.* (**48**, 3, p. 598) Article

J10-053 Experimental Investigation of Flow Separation Control Using an Array of Synthetic Jets. Shanying Zhang and Shan Zhong, *University of Manchester*, Great Britain (**48**, 3, p. 611) Article based on AIAA Paper 2009-4185

J10-054 Vibration Analysis of a Multiple-Layered Viscoelastic Structure Using the Biot Damping Model. Fei Lin and Mohan D. Rao, *Michigan Technological University* (**48**, 3, p. 624) Article

J10-055 Durability and Survivability of Piezoelectric Wafer Active Sensors on Metallic Structure. Bin Lin, Victor Giurgiutiu, and Patrick Pollock, *University of South Carolina*; Buli Xu, *Georgia Institute of Technology*; and James Doane, *Indiana Tech* (**48**, 3, p. 635) Article

J10-056 Nearly All-Speed, Stabilized Time-Accurate Upwind Scheme on Unstructured Grid. Ching Y. Loh and Philip C. Jorgenson, *NASA John H. Glenn Research Center at Lewis Field* (**48**, 3, p. 644) Article based on AIAA Paper 2007-4463

J10-057 Damage Detection in a Plate Using Beam-Focused Shear-Horizontal Wave Magnetostrictive Patch Transducers. Ju Seung Lee and Hoe Woong Kim, *Seoul National University*, (ROK); Byung Chul Jeon, *Aero Technology Research Institute*, (ROK); Seung Hyun Cho, *Korea Research Institute of Standards and Science*, (ROK); and Yoon Young Kim, *Seoul National University*, (ROK) (**48**, 3, p. 654) Article based on AIAA Paper 2009-2381

J10-058 Analytical Modeling of Cracked Thin-Walled Beams Under Torsion. Thi D. Dang, Rakesh K. Kapania, and Mayuresh J. Patil, *Virginia Polytechnic Institute and State University* (**48**, 3, p. 664) Article based on AIAA Paper 2009-2367

J10-059 Numerical Simulation of Glass-Fiber-Reinforced Aluminum Laminates with Diverse Impact Damage. Hyoungseock Seo, Jake Hundley, H. T. Hahn, and Jeen-Ming Yang, *University of California, Los Angeles* (**48**, 3, p. 676) Article

J10-060 Experimental Investigation of Intake Ground Vortices During Takeoff. J. P. Murphy and D. G. MacManus, *Cranfield University*, Great Britain; and C. T. Sheaf, *Rolls–Royce, plc.*, Great Britain (**48**, 3, p. 688) Article

J10-061 Classifying Induced Damage in Composite Plates Using One-Class Support Vector Machines. Santanu Das, *University of California, Santa Cruz*; Aditi Chattopadhyay, *Arizona State University*; and Ashok N. Srivastava, *NASA Ames Research Center* (**48**, 4, p. 705) Article

J10-062 Aeroacoustics of Drag-Generating Swirling Exhaust Flows. P. N. Shah, D. Mobed, and Z. S. Spakovszky, *Massachusetts Institute of Technology*; T. F. Brooks and W. M. Humphreys, *NASA Langley Research Center* (**48**, 4, p. 719) Article based on AIAA Paper 2007-3714

J10-063 Energy-Dissipating Composite Members with Progressive Failure: Impulsive Response and Experimental Verification. D. Stefan Dancila and Erian A. Armanios, *University of Texas at Arlington* (**48**, 4, p. 728) Article

J10-064 Fluid–Structure–Acoustic Interaction of the Flow Past a Thin Flexible Structure. Frank Schäfer, Stefan Müller, Thomas Uffinger, Stefan Becker, and Jens Grabinger, *University of Erlangen-Nuremberg*, Germany; and Manfred Kaltenbacher, *Alps-Adriatic University*, Germany (**48**, 4, p. 738) Article based on AIAA Paper 2008-3058

J10-065 Free-Vibration Analysis of Ring-Stiffened Branched Composite Shells of Revolution. Altan Kayran and Erdem Yavuzbalkan, *Middle East Technical University*, Turkey (**48**, 4, p. 749) Article based on AIAA Paper 2007-2114

J10-066 Evaluation of Euler Fluxes for Hypersonic Heating Computations. Keiichi Kitamura and Eiji Shima, *Japan Aerospace Exploration Agency*, Japan; Yoshiaki Nakamura, *Nagoya University*, Japan; and Philip L. Roe, *University of Michigan* (**48**, 4, p. 763) Article

J10-067 Consistent Regularization for Damage Detection with Noise and Model Errors. X. Y. Li and S. S. Law, *Hong Kong Polytechnic University*, Hong Kong (PRC) (**48**, 4, p. 777) Article

J10-068 Contrasting the Harmonic Balance and Linearized Methods for Oscillating-Flap Simulations. Guillaume Dufour, Frédéric Sicot, and Guillaume Puigt, *European Center for Research and Advanced Training in Scientific Computing*, France; Cédric Liauzun and Alain Dugeai, *French Aerospace Laboratory*, France (**48**, 4, p. 788) Article

J10-069 Aeroelastic-Acoustics Simulation of Flight Systems. K. K. Gupta, *NASA Dryden Flight Research Center*; S. B. Choi, *Advanced Engineering Solutions, Inc.*; and A. Ibrahim, *Norfolk State University* (**48**, 4, p. 798) Article based on AIAA Paper 2009-39

J10-070 Unstructured-Grid Third-Order Finite Volume Discretization Using a Multistep Quadratic Data-Reconstruction Method. D. Caraeni and D. C. Hill, *ANSYS, Inc.* (**48**, 4, p. 808) Article based on AIAA Paper 2009-1332

J10-071 Elastic Properties of Open-Cell Foams with Tetrakaidecahedral Cells Using Finite Element Analysis. Prasanna Thiyagasundaram, Bhavani V. Sankar, and Nagaraj K. Arakere, *University of Florida* (**48**, 4, p. 818) Article based on AIAA Paper 2009-2684

J10-072 Application of Inlet Injection to a Three-Dimensional Scramjet at Mach 8. James C. Turner and Michael K. Smart, *University of Queensland*, Australia (**48**, 4, p. 829) Article

J10-073 Critical Study of Agglomerated Multigrid Methods for Diffusion. Hiroaki Nishikawa and Boris Diskin, *National Institute of Aerospace*; and James L. Thomas, *NASA Langley Research Center* (**48**, 4, p. 839) Article based on AIAA Paper 2009-4138

J10-074 Frequency-Domain Linearized Euler Model for Turbomachinery Noise Radiation Through Engine Exhaust. Andrea Iob and Renzo Arina, *Politecnico di Torino*, Italy; and Claudia Schipani, *Avio R&D*, Italy (**48**, 4, p. 848) Article based on AIAA Paper 2009-3287

J10-075 Impact of Pressure and Temperature on the Performance of Plasma Actuators. Philippe Versailles, Vincent Gingras-Gosselin, and Huu Duc Vo, *École Polytechnique de Montréal*, Canada (**48**, 4, p. 859) Technical Note

J10-076 Effect of Wing Flexibility on Lift and Thrust Production in Flapping Flight. Pradeep Gopalakrishnan and Danesh K. Tafti, *Virginia Polytechnic Institute and State University* (**48**, 5, p. 865) Article

J10-077 Sound Transmission from a Source Outside a Non-isothermal Boundary Layer. L. M. Campos, *Instituto Superior Técnico*, Portugal; and M. H. Kobayashi, *University of Hawaii at Manoa* (**48**, 5, p. 878) Article

J10-078 Introduction to the Bayesian Approach Applied to Elastic Constants Identification. Christian Gogu, *École des Mines de Saint Etienne*, France; Raphael Haftka, *University of Florida*; Rodolphe Le Riche, Jérôme Molimard, and Alain Vautrin, *École des Mines de Saint Etienne*, France (**48**, 5, p. 893) Article

J10-079 Advanced Unstructured Grid Generation for Complex Aerodynamic Applications. Shahyar Z. Pirzadeh, *NASA Langley Research Center* (**48**, 5, p. 904) Article based on AIAA Paper 2008-7178

J10-080 Geometric Filtration Using Proper Orthogonal Decomposition for Aerodynamic Design Optimization. David J. Toal, Neil W. Bressloff, and Andy J. Keane, *University of Southampton*, Great Britain; and Carren M. Holden, *Airbus Operations, Ltd.*, Great Britain (**48**, 5, p. 916) Article based on AIAA Paper 2008-6584

J10-081 Numerical Study of Acoustic Installation Effects with a Computational Aeroacoustics Method. S. Redonnet, G. Desquesnes, and E. Manoha, *ONERA*, France; and C. Parzani, *Airbus Industries*, France (**48**, 5, p. 929) Article based on AIAA Paper 2007-3501

J10-082 Stochastic Investigation of Flows About Airfoils at Transonic Speeds. J.-C. Chassaing, *Université Pierre-et-Marie-Curie*, France; and D. Lucor, *Centre National de la Recherche Scientifique*, France (**48**, 5, p. 938) Article

J10-083 Rotating Blade Trailing-Edge Noise: Experimental Validation of Analytical Model. Yannick Rozenberg, *ONERA*, France; Michel Roger, *École Centrale de Lyon*, France; and Stéphane Moreau, *Université de Sherbrooke*, Canada (**48**, 5, p. 951) Article based on AIAA Paper 2007-3709

J10-084 Large-Eddy Simulations and Measurements of a Small-Scale High-Speed Coflowing Jet. Simon Eastwood, Paul Tucker, and Hao Xia, *University of Cambridge*, Great Britain; Paul Dunkley and Peter Carpenter, *University of Warwick*, Great Britain (**48**, 5, p. 963) Article based on AIAA Paper 2008-2981

J10-085 Effect of Centerbody Scattering on Advanced Open-Rotor Noise. Michael J. Kingan, Christopher Powles, and Rod H. Self, *University of Southampton*, Great Britain (**48**, 5, p. 975) Article

J10-086 Comparison of Gradient-Based and Gradient-Enhanced Response-Surface-Based Optimizers. J. Laurenceau, *Centre Européen de Recherche et Formation Avancées en Calcul Scientifique*, France; M. Meaux, *Airbus Industries*, France; M. Montagnac, *Centre Européen de Recherche et Formation Avancées en Calcul Scientifique*, France; and P. Sagaut, *Université Pierre-et-Marie-Curie*, France (**48**, 5, p. 981) Article based on AIAA Paper 2008-1889

J10-087 Comparison of Surrogate Models in a Multidisciplinary Optimization Framework for Wing Design. Ricardo M. Paiva, André R. Carvalho, Curran Crawford, and Afzal Suleman, *University of Victoria*, Canada (**48**, 5, p. 995) Article based on AIAA Paper 2009-2203

J10-088 Computational Modeling and Experiments of Natural Convection for a Titan Montgolfiere. Arnab Samanta, Daniel Appelö, and Tim Colonius, *California Institute of Technology*; Julian Nott, *Nott Technology, LLC*; and Jeffrey Hall, *Jet Propulsion Laboratory, California Institute of Technology* (**48**, 5, p. 1007) Article based on AIAA Paper 2009-2806

J10-089 Transonic Unsteady Potential Flow: Scaling Analysis of Linear and Nonlinear Dynamics. Earl H. Dowell, *Duke University* (**48**, 5, p. 1017) Technical Note

J10-090 Penetration Characteristics of Film-Cooling Jets at High Blowing Ratio. Lamyaa El-Gabry, *American University in Cairo*, Egypt; James Heidmann, *NASA John H, Glenn Research Center at Lewis Field*; and Ali Ameri, *Ohio State University* (**48**, 5, p. 1020) Technical Note

J10-091 Validation Studies of Fully Implicit, Parallel Finite Element Simulations of Laminar Hypersonic Flows. Benjamin S. Kirk, *NASA Johnson Space Center*; and Graham F. Carey, *University of Texas at Austin* (**48**, 6, p. 1025) Article

J10-092 Bifurcation Prediction of Large-Order Aeroelastic Models. K. J. Badcock and M. A. Woodgate, *University of Liverpool*, Great Britain (**48**, 6, p. 1037) Article based on AIAA Paper 2008-1820

J10-093 Numerical Investigation of Transverse Hydrogen Jet into Supersonic Crossflow Using Detached-Eddy Simulation. Su-Hee Won and In-Seuck Jeung, *Seoul National University*, (ROK); Bernard Parent and Jeong-Yeol Choi, *Pusan National University*, (ROK) (**48**, 6, p. 1047) Article

J10-094 Finite Difference Lattice Boltzmann Method for Compressible Thermal Fluids. R. M. So, S. C. Fu, and R. C. Leung, *Hong Kong Polytechnic University*, Hong Kong (PRC) (**48**, 6, p. 1059) Article

J10-095 Enhancement of Class of Adjoint Design Methods via Optimization of Parameters. Sangho Kim, *Konkuk University*, (ROK); Kaveh Hosseini, *Exponent, Inc.*; Kasidit Leoviriyakit, *Airbus UK*, Great Britain; and Antony Jameson, *Stanford University* (**48**, 6, p. 1072) Article based on AIAA Paper 2005-0448

J10-096 Investigation of the Taylor–Culick Flow Through Particle Image Velocimetry and Numerical Simulation. D. Laboureur, B. Tóth, and J. Anthoine, *von Karman Institute for Fluid Dynamics*, France (**48**, 6, p. 1077) Article based on AIAA Paper 2008-5052

J10-097 Random Eigenvalue Problems in Structural Dynamics: Experimental Investigations. S. Adhikari, *Swansea University*, Great Britain; and A. Srikantha Phani, *University of British Columbia*, Canada (**48**, 6, p. 1085) Article

J10-098 Compressible Large-Eddy Simulation of Separation Control on a Wall-Mounted Hump. Jennifer A. Franck and Tim Colonius, *California Institute of Technology* (**48**, 6, p. 1098) Article based on AIAA Paper 2008-555

J10-099 Interval Analysis Method for Damage Identification of Structures. Xiaojun Wang, Haifeng Yang, and Zhiping Qiu, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 6, p. 1108) Article

J10-100 Unifying Perspective for Gappy Proper Orthogonal Decomposition and Probabilistic Principal Component Analysis. Kyunghoon Lee and Dimitri N. Mavris, *Georgia Institute of Technology* (**48**, 6, p. 1117) Article based on AIAA Paper 2009-3899

J10-101 Robust Cartesian Grid Flow Solver for High-Reynolds-Number Turbulent Flow Simulations. Ya'eer Kidron, Yair Mor-Yossef, and Yuval Levy, *Israeli Computational Fluid Dynamics Center*, Israel (**48**, 6, p. 1130) Article based on AIAA Paper 2009-3881

J10-102 Integrated Local Petrov–Galerkin Sinc Method for Structural Mechanics Problems. Wesley C. Slemp, Rakesh K. Kapania, and Sameer B. Mulani, *Virginia Polytechnic Institute and State University* (**48**, 6, p. 1141) Article based on AIAA Paper 2009-2392

J10-103 Adaptive Polynomial Chaos for Gas Turbine Compression Systems Performance Analysis. Tiziano Ghisu, Geoffrey T. Parks, Jerome P. Jarrett, and P. John Clarkson, *University of Cambridge*, Great Britain (**48**, 6, p. 1156) Article based on AIAA Paper 2008-5828

J10-104 Asymptotical Construction of an Efficient High-Fidelity Model for Multilayer Functionally Graded Plates. Hui Chen and Wenbin Yu, *Utah State University* (**48**, 6, p. 1171) Article based on AIAA Paper 2009-2135

J10-105 Boundary-Layer Transition on Broad Cones Rotating in an Imposed Axial Flow. S. J. Garrett, *University of Leicester*, Great Britain; Z. Hussain and S. O. Stephen, *University of Birmingham*, Great Britain (**48**, 6, p. 1184) Article based on AIAA Paper 2009-3810

J10-106 Discrete Adjoint-Based Design Optimization of Unsteady Turbulent Flows on Dynamic Unstructured Grids. Eric J. Nielsen, *NASA Langley Research Center*; Boris Diskin, *National Institute of Aerospace*; and Nail K. Yamaleev, *North Carolina A&T State University* (**48**, 6, p. 1195) Article based on AIAA Paper 2009-3802

J10-107 Effect of Pitch Rate on Near-Surface Topology on a Delta Wing. T. Goruney and D. Rockwell, *Lehigh University* (**48**, 6, p. 1207) Article

J10-108 Simulations of Vortex Formation Around a Blunt Wing Tip. Ali Uzun and M. Yousuff Hussaini, *Florida State University* (**48**, 6, p. 1221) Article based on AIAA Paper 2009-2913

J10-109 Effects of Flexible Fin on Low-Frequency Oscillation in Post-Stalled Flows. Tianshu Liu, J. Montefort, and S. Pantula, *Western Michigan University* (**48**, 6, p. 1235) Article based on AIAA Paper 2009-1106

J10-110 Computational Analysis of Mach Number Effects on the Edgetone Phenomenon. Taku Nonomura, *University of Tokyo*, Japan; Hiroko Muranaka, *Tokyo College of Music*, Japan; and Kozo Fujii, *Japan Aerospace Exploration Agency*, Japan (**48**, 6, p. 1248) Technical Note based on AIAA Paper 2006-2876

J10-111 Evaluation of the Force Limited Vibration Semi-Empirical Constant for a Two-Degrees-of-Freedom System. Paul Marchand, *Routes AstroEngineering*, Canada; and Raj Singhal, *Canadian Space Agency*, Canada (**48**, 6, p. 1251) Technical Note

J10-112 Near-Field Acoustic Characteristics of a Turbulent Axisymmetric Pulsed Jet. Rajan Kumar, Anjaneyulu Krothapalli, and Isaac Choutapalli, *Florida State University* (**48**, 6, p. 1256) Technical Note based on AIAA Paper 2008-3030

J10-113 Pitch, Roll, and Yaw Damping of a Flapping Wing. Shigeru Sunada, Yuki Hatayama, and Hiroshi Tokutake, *Osaka Prefecture University*, Japan (**48**, 6, p. 1261) Technical Note

J10-114 Shape Memory Alloy–Piezoelectric Active Structures for Reversible Actuation of Bistable Composites. Hyunsun A. Kim, David N. Betts, Aki I. Salo, and Christopher R. Bowen, *University of Bath*, Great Britain (**48**, 6, p. 1265) Technical Note

J10-115 Energy Transformation to Generalized Timoshenko Form for Nonuniform Beams. Jimmy C. Ho and Dewey H. Hodges, *Georgia Institute of Technology*; and Wenbin Yu, *Utah State University* (**48**, 6, p. 1268) Technical Note

J10-116 Improved Drag Correlation for Spheres and Application to Shock-Tube Experiments. M. Parmar, A. Haselbacher, and S. Balachandar, *University of Florida* (**48**, 6, p. 1273) Technical Note

J10-117 Interface Debonding Between a Platelike Nanomaterial and the Substrate. Z.-H. Jin, *University of Maine*; and L. Tan, *University of Nebraska* (**48**, 6, p. 1276) Technical Note

J10-118 Structural Health Monitoring Sensor Placement Optimization Under Uncertainty. Robert F. Guratzsch and Sankaran Mahadevan, *Vanderbilt University* (**48**, 7, p. 1281) Article based on AIAA Paper 2006-7034

J10-119 Using Reynolds-Averaged Navier–Stokes Calculations to Predict Trailing-Edge Noise. Stewart Glegg, *Florida Atlantic University*; Bruce Morin and Oliver Atassi, *Pratt and Whitney Aircraft, United Technologies Corporation*; and Ramons Reba, *United Technologies Research Center* (**48**, 7, p. 1290) Article based on AIAA Paper 2008-2993

J10-120 Unsteady Separation Control on Wind Turbine Blades Using Fluidic Oscillators. Ciro Cerretelli, *General Electric Global Research Europe*, Italy; Werner Wuerz, *University of Stuttgart*, Germany; and Emad Gharaibah, *General Electric Global Research Europe*, Germany (**48**, 7, p. 1302) Article based on AIAA Paper 2009-0380

J10-121 Jet Noise: Acoustic Analogy Informed by Large Eddy Simulation. S. A. Karabasov, M. Z. Afsar, T. P. Hynes, and A. P. Dowling, *University of Cambridge*, Great Britain; W. A. McMullan, C. D. Pokora, G. J. Page, and J. J. McGuirk, *Loughborough University*, Great Britain (**48**, 7, p. 1312) Article based on AIAA Paper 2008-2985

J10-122 Comparison of Node-Centered and Cell-Centered Unstructured Finite-Volume Discretizations: Viscous Fluxes. Boris Diskin, *National Institute of Aerospace*; James L. Thomas and Eric J. Nielsen, *NASA Langley Research Center*; Hiroaki Nishikawa, *National Institute of Aerospace*; and Jeffery A. White, *NASA Langley Research Center* (**48**, 7, p. 1326) Article based on AIAA Paper 2009-597

J10-123 Efficient Topology Optimization of Large Dynamic Finite Element Systems Using Fatigue. Karim Sherif, *Linz Center of Mechatronics*, Austria; Wolfgang Witteveen and Klaus Puchner, *Magna Powertrain, ECS*, Austria; and Hans Irschik, *Johannes Kepler University*, Austria (**48**, 7, p. 1339) Article

J10-124 Acoustic Resonance in a Model Ducted-Jet System. Victor D. Topalian and Jonathan B. Freund, *University of Illinois at Urbana-Champaign* (**48**, 7, p. 1348) Article

J10-125 Generalized Galerkin Method for Modal Testing of Structure with Pseudomaterials. De-Wen Zhang and Jian-Min Wang, *Beijing Institute of Structure and Environment Engineering*, China (PRC); and Fu-Shang Wei, *Central Connecticut State University* (**48**, 7, p. 1361) Article

J10-126 Micromechanics Modeling of Composites Subjected to Multiaxial Progressive Damage in the Constituents. Brett A. Bednarcyk, *NASA John H. Glenn Research Center at Lewis Field*; Jacob Aboudi, *Tel Aviv University*, Israel; and Steven M. Arnold, *NASA John H. Glenn Research Center at Lewis Field* (**48**, 7, p. 1367) Article

J10-127 Evaluation of the RPM Approach for the Simulation of Broadband Combustion Noise. B. Mühlbauer, R. Ewert, O. Kornow, and B. Noll, *DLR, German Aerospace Center*, Germany (**48**, 7, p. 1379) Article based on AIAA Paper 2009-3285

J10-128 Independent Two-Fields Solution for Full-Potential Unsteady Transonic Flows. A. Parinello and P. Mantegazza, *Politecnico di Milano*, Italy (**48**, 7, p. 1391) Article

J10-129 Nonparametric Fitting of Aerodynamic Data Using Smoothing Thin-Plate Splines. Ernesto Benini and Rita Ponza, *University of Padova*, Italy (**48**, 7, p. 1403) Article

J10-130 Finite Element Model Updating Using Frequency Response Function of Incomplete Strain Data. Akabr Esfandiari, *Amirkabir University of Technology*, Iran; Masoud Sanayei, *Tufts University*; Firooz Bakhtiari-Nejad and Alireza Rahai, *Amirkabir University of Technology*, Iran (**48**, 7, p. 1420) Article

J10-131 NO and OH Spectroscopic Vibrational Temperature Measurements in a Post-Shock Relaxation Region. M. Sharma, J. M. Austin, and N. G. Glumac, *University of Illinois at Urbana-Champaign*; and L. Massa, *University of Texas at Arlington* (**48**, 7, p. 1434) Article based on AIAA Paper 2009-4218

J10-132 Large-Eddy/Reynolds-Averaged Navier–Stokes Simulations of Sonic Injection into Mach 2 Crossflow. John A. Boles and Jack R. Edwards, *North Carolina State University*; and Robert A. Bauerle, *NASA Langley Research Center* (**48**, 7, p. 1444) Article based on AIAA Paper 2008-0622

J10-133 Numerical Investigation on the Aerodynamics of Oscillating Airfoils with Deployable Gurney Flaps. Michael P. Kinzel and Mark D. Maughmer, *Pennsylvania State University*; and Earl P. Duque, *Intelligent Light* (**48**, 7, p. 1457) Article based on AIAA Paper 2005-1039

J10-134 Microphone-Array Measurements in a Cryogenic Wind Tunnel. Thomas Ahlefeldt and Lars Koop, *DLR, German Aerospace Research Center*, Germany (**48**, 7, p. 1470) Article based on AIAA Paper 2009-3185

J10-135 Effect of Interaction Strength on Unsteadiness in Shock-Wave-Induced Separations. Louis J. Souverein, Pierre Dupont, Jean-Francois Debiéve, and Jean-Paul Dussauge, *Université de Provence*, France; and Bas W. van Oudheusden and Fulvio Scarano, *Delft University of Technology*, The Netherlands (**48**, 7, p. 1480) Article based on AIAA Paper 2009-3715

J10-136 Three-Dimensional Modeling of Magnetic Nozzle Processes. Heath Lorzel and Pavlos G. Mikellides, *Arizona State University* (**48**, 7, p. 1494) Article based on AIAA Paper 2008-4759

J10-137 Effect of Velocity Ratio on Noise Source Distribution of Coaxial Jets. Dimitri Papamoschou and Sara Rostamimonjezi, *University of California, Irvine* (**48**, 7, p. 1504) Article based on AIAA Paper 2007-440

J10-138 Simulation of Sandia Flame D Using Velocity-Scalar Filtered Density Function. M. B. Nik, S. L. Yilmaz, and P. Givi, *University of Pittsburgh*; M. R. Sheikhi, *Northeastern University*; and S. B. Pope, *Cornell University* (**48**, 7, p. 1513) Article

J10-139 Modified Dynamic Preisach Model for Hysteresis. Mohammed R. Sunny and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 7, p. 1523) Article based on AIAA Paper 2009-2543

J10-140 Assessment of Bhatnagar–Gross–Krook Approaches for Near Continuum Regime Nozzle Flows. Rakesh Kumar, E. V. Titov, and D. A. Levin, *Pennsylvania State University*; N. E. Gimelshein and S. F. Gimelshein, *Edwards Research Center, Inc.* (**48**, 7, p. 1531) Article based on AIAA Paper 2009-1318

J10-141 Treatment of Nonmatched Grids for High-Accuracy Navier–Stokes Solutions. Boris Epstein, *Academic College of Tel-Aviv-Yaffo*, Israel; and Sergey Peigin, *Israel Aircraft Industries*, Israel (**48**, 7, p. 1542) Article based on AIAA Paper 2009-3538

J10-142 Effect of Shock-Capturing Errors on Turbulence Statistics. Johan Larsson, *Stanford University* (**48**, 7, p. 1554) Technical Note

J10-143 Observation of an Ablating Surface in Expansion Tunnel Flow. Mary G. D'Souza, Troy N. Eichmann, Daniel F. Potter, Richard G. Morgan, Timothy J. McIntyre, and Peter A. Jacobs, *University of Queensland*, Australia; and Neil R. Mudford, *University of New South Wales*, Australia (**48**, 7, p. 1557) Technical Note

J10-144 Improvements to Obtain a Unique Solution in System Identification. Masayoshi Misawa, *Shizuoka University*, Japan; and Atsushi Hirano, *Kawasaki Heavy Industries*, Japan (**48**, 7, p. 1561) Technical Note based on AIAA Paper 2000-4178

J10-145 Flow Behind a Step in High-Enthalpy Laminar Hypersonic Flow. S. L. Gai, *University of New South Wales, Australian Defence Force Academy*, Australia (**48**, 7, p. 1563) Technical Note

J10-146 Vibration of Plate with Curvilinear Stiffeners Using Mesh-Free Method. Ali Yeilaghi Tamijani and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 8, p. 1569) Article based on AIAA Paper 2009-2647

J10-147 Numerical Simulation of Low-Pressure Turbine Blade Separation Control. A. Gross and H. F. Fasel, *University of Arizona* (**48**, 8, p. 1582) Article based on AIAA Paper 2008-4321

J10-148 Invariant Finite Element Model for Composite Structures: The Generalized Unified Formulation. Luciano Demasi, *San Diego State University* (**48**, 8, p. 1602) Article based on AIAA Paper 2009-2342

J10-149 Turbulent Boundary-Layer Separation Control with Single Dielectric Barrier Discharge Plasma Actuators. David M. Schatzman and Flint O. Thomas, *University of Notre Dame* (**48**, 8, p. 1620) Article based on AIAA Paper 2008-4199

J10-150 Scramjet Experiments in an Expansion Tunnel: Evaluated Using a Quasi-Steady Analysis Technique. Matthew McGilvray, Richard G. Morgan, and Peter A. Jacobs, *University of Queensland*, Australia (**48**, 8, p. 1635) Article based on AIAA Paper 2009-7414

J10-151 Comparison of Mach 10 Scramjet Measurements from Different Impulse Facilities. Matthew McGilvray, Rainer Kirchhartz, and Thomas Jazra, *University of Queensland*, Australia (**48**, 8, p. 1647) Article

J10-152 Generalized Linear Random Vibration Analysis Using Autocovariance Orthogonal Decomposition. Sameer B. Mulani, Rakesh K. Kapania, and Karen M. Scott, *Virginia Polytechnic Institute and State University* (**48**, 8, p. 1652) Article

J10-153 Energy Deposition Applied to a Transverse Jet in a Supersonic Crossflow. Eli Lazar, Gregory Elliott, and Nick Glumac, *University of Illinois at Urbana-Champaign* (**48**, 8, p. 1662) Article based on AIAA Paper 2009-1534

J10-154 Turbulence Modeling for Low-Reynolds-Number Flows. P. Catalano, *Italian Aerospace Research Center*, Italy; and R. T. , *University of Naples "Federico II,"* Italy (**48**, 8, p. 1673) Article

J10-155 Fluidic Control of a Turret Wake: Aerodynamic and Aero-Optical Effects. Bojan Vukasinovic and Ari Glezer, *Georgia Institute of Technology*; Stanislav Gordeyev and Eric Jumper, *University of Notre Dame*; and Valdis Kibens, *The Boeing Company* (**48**, 8, p. 1686) Article based on AIAA Paper 2009-0816

J10-156 Parametric Study for Dynamics of Spacecraft with Local Nonlinearities. F. Wei, *Harbin Institute of Technology*, China (PRC); L. Liang and G. T. Zheng, *Tsinghua University*, China (PRC) (**48**, 8, p. 1700) Article

J10-157 Combination of Image Postprocessing Tools to Identify Coherent Structures of Premixed Flames. Arnaud Lacarelle, Dirk M. Luchtenburg, and Mirko R. Bothien, *Technische Universität Berlin*, Germany; Bernd R. Noack, *Institut Pprime*, France; and Christian O. Paschereit, *Technische Universität Berlin*, Germany (**48**, 8, p. 1708) Article

J10-158 Studies on Fluid-Thermal-Structural Coupling for Aerothermoelasticity in Hypersonic Flow. Adam J. Culler and Jack J. McNamara, *Ohio State University* (**48**, 8, p. 1721) Article based on AIAA Paper 2009-2634

J10-159 Numerical Simulations of Shock Focusing over Concave Surfaces. David Taieb, Guillaume Ribert, and Abdellah Hadjadj, *Complexe de Recherche Interprofessionnel en Aérothermochimie*, France (**48**, 8, p. 1739) Article

J10-160 Effects of Injection and Main Flow Conditions on Supersonic Turbulent Mixing Structure. Hidemi Takahashi and Goro Masuya, *Tohoku University*, Japan; and Mitsutomo Hirota, *Muroran Institute of Technology*, Japan (**48**, 8, p. 1748) Article based on AIAA Paper 2009-7408

J10-161 Vortex Filament Simulation of the Turbulent Boundary Layer. Peter S. Bernard, *University of Maryland*; Pat Collins and Mark Potts, *VorCat, Inc.* (**48**, 8, p. 1757) Article based on AIAA Paper 2009-3547

J10-162 Large-Eddy Simulation: Current Capabilities, Recommended Practices, and Future Research. Nicholas J. Georgiadis, *NASA John H. Glenn Research Center at Lewis Field*; Donald P. Rizzetta, *U.S. Air Force Research Laboratory*; and Christer Fureby, *Swedish Defense Research Agency—FOI*, Sweden (**48**, 8, p. 1772) Article based on AIAA Paper 2009-0948

J10-163 Lift Enhancement for Low-Aspect-Ratio Wings with Periodic Excitation. Kunihiko Taira and Clarence W. Rowley, *Princeton University*; Tim Colonius, *California Institute of Technology*; and David R. Williams, *Illinois Institute of Technology* (**48**, 8, p. 1785) Article

J10-164 Surrogate Modeling for Uncertainty Assessment with Application to Aviation Environmental System Models. D. Allaire and K. Willcox, *Massachusetts Institute of Technology* (**48**, 8, p. 1791) Article based on AIAA Paper 2008-5890

J10-165 Aerothermodynamics Behind a Blunt Body at Superorbital Speeds. Gisu Park, Sudhir L. Gai, and Andrew J. Neely, *University of New South Wales*, Australia (**48**, 8, p. 1804) Article

J10-166 Geometry Parameterization and Computational Mesh Deformation by Physics-Based Direct Manipulation Approaches. Wataru Yamazaki, Sylvain Mouton, and Gerald Carrier, *ONERA*, France (**48**, 8, p. 1817) Article based on AIAA Paper 2008-5953

J10-167 Dynamic Thermoelastic Analysis of a Slab Using Finite Integral Transformation Method. Jianli Ruan, Xue Feng, Guobing Zhang, and Yong Wang, *Tsinghua University*, China (PRC); and Daining Fang, *Peking University*, China (PRC) (**48**, 8, p. 1833) Article

J10-168 Component Modal Tests with Additional Mass and Stiffness. Masayoshi Misawa, *Shizuoka University*, Japan (**48**, 8, p. 1840) Article based on AIAA Paper 2006-1660

J10-169 Feedback Control of Boundary-Layer Bypass Transition: Comparison of Simulations with Experiments. Antonios Monokrousos, Fredrik Lundell, and Luca Brandt, *Royal Institute of Technology*, Sweden (**48**, 8, p. 1848) Technical Note based on AIAA Paper 2009-0612

J10-170 Control of the Flow over a Delta Wing in the Transonic Regime. Jacques Riou and Eric Garnier, *ONERA*, France; and Claude Basdevant, *Université Paris 13*, France (**48**, 8, p. 1851) Technical Note

J10-171 Computational Simulations of the Effect of Backstep Height on Nonpremixed Combustion Instability. R. Smith, G. Xia, W. A. Anderson, and C. L. Merkle, *Purdue University* (**48**, 9, p. 1857) Article based on AIAA Paper 2008-5250

J10-172 Plasma Volumetric Effects on the Force Production of a Plasma Actuator. G. I. Font, C. L. Enloe, and T. E. McLaughlin, *U.S. Air Force Academy* (**48**, 9, p. 1869) Article based on AIAA Paper 2009-4285

J10-173 Velocimetry Measurements of Unstart of an Inlet-Isolator Model in Mach 5 Flow. J. L. Wagner, *University of Texas at Austin*; K. B. Yuceil, *Istanbul Technical University*, Turkey; and N. T. Clemens, *University of Texas at Austin* (**48**, 9, p. 1875) Article based on AIAA Paper 2009-4209

J10-174 Active Flow Control for NACA 6-Series Airfoil at Re = 64,200. A. Gross and H. F. Fasel, *University of Arizona* (**48**, 9, p. 1889) Article based on AIAA Paper 2009-4275

J10-175 Node Sampling for Nonlinear Vibration Analysis of Structures with Intermittent Contact. Akira Saito and Bogdan I. Epureanu, *University of Michigan*; Matthew P. Castanier, *U.S. Army Tank Automotive Research, Development, and Engineering Center*; and Christophe Pierre, *McGill University*, Canada (**48**, 9, p. 1903) Article based on AIAA Paper 2009-2493

J10-176 Flame Imaging of Gas-Turbine Relight. R. W. Read, J. W. Rogerson, and S. Hochgreb, *University of Cambridge*, Great Britain (**48**, 9, p. 1916) Article based on AIAA Paper 2008-0957

J10-177 Validation of an Output-Adaptive, Tetrahedral Cut-Cell Method for Sonic Boom Prediction. Michael A. Park, *NASA Langley Research Center*; and David L. Darmofal, *Massachusetts Institute of Technology* (**48**, 9, p. 1928) Article based on AIAA Paper 2008-6594

J10-178 Reduced-Order Model for Viscous Aerodynamic Flow Past an Airfoil. D. Alonso, J. M. Vega, and A. Velazquez, *Universidad Politécnica de Madrid*, Spain (**48**, 9, p. 1946) Article

J10-179 Experimental and Numerical Fluid-Structure Analysis of Rigid and Flexible Flapping Airfoils. Stephan Bansmer, Rolf Radespiel, Ralf Unger, Matthias Haupt, and Peter Horst, *Technische Universität Braunschweig*, Germany (**48**, 9, p. 1959) Article

J10-180 Effect of Evaporating Droplets on Shock Waves. James Kersey, *Gamma Technologies, Inc.*; Eric Loth, *University of Virginia*; and Dennis Lankford, *Aerospace Testing Alliance* (**48**, 9, p. 1975) Article based on AIAA Paper 2008-793

J10-181 Variable-Kinematics Approach for Linearized Buckling Analysis of Laminated Plates and Shells. M. D'Ottavio, *Université Paris Ouest*, France; and E. Carrera, *Politecnico di Torino*, Italy (**48**, 9, p. 1987) Article

J10-182 Computation of Wall Pressure Spectra from Steady Flow Data for Noise Prediction. S. Remmler, J. Christophe, and J. Anthoine, *von Karman Institute for Fluid Dynamics*, Belgium; and S. Moreau, *Université de Sherbrooke*, Canada (**48**, 9, p. 1997) Article based on AIAA Paper 2010-4000

J10-183 Optimizing a Boundary-Layer-Ingestion Offset Inlet by Discrete Adjoint Approach. Byung Joon Lee and Meng-Sing Liou, *NASA John H. Glenn Research Center at Lewis Field*; and Chongam Kim, *Seoul National University*, (ROK) (**48**, 9, p. 2008) Article based on AIAA Paper 2009-3804

J10-184 Nonlinear Analysis of Smart Composite Plates Including Hysteresis Effects. V. L. Sateesh, C. S. Upadhyay, and C. Venkatesan, *Indian Institute of Technology*, India (**48**, 9, p. 2017) Article

J10-185 Towards Real-Time Computational-Fluid-Dynamics-Based Aeroelastic Computations Using a Database of Reduced-Order Information. David Amsallem, Julien Cortial, and Charbel Farhat, *Stanford University* (**48**, 9, p. 2029) Article based on AIAA Paper 2009-0800

J10-186 Towards Numerical Simulation of Fan Broadband Noise Aft Radiation from Aeroengines. G. Reboul and C. Polacsek, *ONERA*, France (**48**, 9, p. 2038) Article based on AIAA Paper 2009-3337

J10-187 Effect of Frontal Gusts on Forward Flapping Flight. Kamal Viswanath and Danesh K. Tafti, *Virginia Polytechnic Institute and State University* (**48**, 9, p. 2049) Article

J10-188 Large-Eddy Simulation of Jet Mixing in Supersonic Crossflows. Soshi Kawai and Sanjiva K. Lele, *Stanford University* (**48**, 9, p. 2063) Article based on AIAA Paper 2009-3795

J10-189 Elastic-Plastic Analysis by Integrated Local Petrov–Galerkin Sinc Method. Wesley C. Slemp, Sameer B. Mulani, and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 9, p. 2084) Article

J10-190 Analytical Sensitivities of Principal Components in Time-Series Analysis of Dynamical Systems. D. T. Griffith, *Sandia National Laboratories* (**48**, 9, p. 2099) Article based on AIAA Paper 2009-2650

J10-191 Flapping Wing Structural Deformation and Thrust Correlation Study with Flexible Membrane Wings. Pin Wu and Peter Ifju, *University of Florida*; and Bret Stanford, *U.S. Air Force Research Laboratory* (**48**, 9, p. 2111) Article

J10-192 Numerical Study of Wind-Tunnel Sidewall Effects on Circulation Control Airfoil Flows. Takafumi Nishino and Karim Shariff, *NASA Ames Research Center* (**48**, 9, p. 2123) Article

J10-193 Large-Eddy Simulation of Supercritical-Pressure Round Jets. Thomas Schmitt, *Centre Européen de Recherche et Formation Avancée en Calcul Scientifique*, France; Laurent Selle, *Institut de Mécanique des Fluides de Toulouse*, France; Anthony Ruiz and Bénédicte Cuenot, *Centre Européen de Recherche et Formation Avancée en Calcul Scientifique*, France (**48**, 9, p. 2133) Article

J10-194 Strategic Control of Transverse Jet Shear Layer Instabilities. J. Davitian, C. Hendrickson, D. Getsinger, R. T. M'Closkey, and A. R. Karagozian, *University of California, Los Angeles* (**48**, 9, p. 2145) Article based on AIAA Paper 2008-0741

J10-195 Efficient Adaptive Cartesian Vorticity Transport Solver for Vortex-Dominated Flows. Robert E. Harris, Essam F. Sheta, and Sami D. Habchi, *CFD Research Corporation* (**48**, 9, p. 2157) Article based on AIAA Paper 2010-1072

J10-196 DAMAS2 Using a Point-Spread Function Weakly Varying in Space. Takao Suzuki, *The Boeing Company* (**48**, 9, p. 2165) Technical Note

J10-197 Impact of Harmonic Perturbations on a Turbulent Mixing Layer. Yuli Lifshitz and David Degani, *Technion–Israel Institute of Technology*, Israel (**48**, 9, p. 2169) Technical Note

J10-198 Influence of Hall Effect on Electrodynamic Heat Shield System for Reentry Vehicles. Hirotaka Otsu, *Shizuoka University*, Japan; Detlev Konigorski, *EADS Astrium*, Germany; and Takashi Abe, *Japan Aerospace Exploration Agency*, Japan (**48**, 10, p. 2177) Article based on AIAA Paper 2005-5049

J10-199 Nonlinear Aeroelastic Study for Folding Wing Structures. Peter J. Attar, *University of Oklahoma*; Deman Tang and Earl H. Dowell, *Duke University* (**48**, 10, p. 2187) Article

J10-200 Symmetrization Procedure for Structure-Fluid Cavity System Involving Pseudostatic Correction. A. Alia and M. Souli, *Université des Sciences et Technologie de Lille*, France (**48**, 10, p. 2196) Article based on AIAA Paper 2009-4201

J10-201 Factorial Design Experiment to Analyze the Response of a Luminescent Photoelastic Coating. Daniel R. Gerber and James P. Hubner, *University of Alabama in Tuscaloosa* (**48**, 10, p. 2206) Article based on AIAA Paper 2010-0188

J10-202 Numerical Simulation on Plasma Circulation Control Airfoil. P. Zhang, B. Yan, A. B. Liu, and J. J. Wang, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 10, p. 2213) Article

J10-203 Applications of Actuator Disk Theory to Membrane Flapping Wings. Sergey Shkarayev and Dmytro Silin, *University of Arizona* (**48**, 10, p. 2227) Article based on AIAA Paper 2009-0878

J10-204 Effects of Structural Tests on Aircraft Safety. Erdem Acar, *TOBB University of Economics and Technology*, Turkey; Raphael T. Haftka and Nam H. Kim, *University of Florida* (**48**, 10, p. 2235) Article based on AIAA Paper 2009-2265

J10-205 Computation of High-Speed Coaxial Jets with Fan Flow Deflection. Juntao Xiong, Preben Nielsen, Feng Liu, and Dimitri Papamoschou, *University of California, Irvine* (**48**, 10, p. 2249) Article based on AIAA Paper 2009-3254

J10-206 Simultaneous Particle Image Velocimetry and Microphone Array Measurements on a Rod-Airfoil Configuration. A. Henning, *Berlin Institute of Technology*, Germany; L. Koop and K. Ehrenfried, *DLR, German Aerospace Center*, Germany (**48**, 10, p. 2263) Article based on AIAA Paper 2009-3184

J10-207 Acoustic Analogy Formulations Accelerated by Fast Multipole Method for Two-Dimensional Aeroacoustic Problems. William R. Wolf and Sanjiva K. Lele, *Stanford University* (**48**, 10, p. 2274) Article based on AIAA Paper 2009-3231

J10-208 Using Cross Validation to Design Conservative Surrogates. Felipe A. Viana, Victor Pecheny, and Raphael T. Haftka, *University of Florida* (**48**, 10, p. 2286) Article

J10-209 Acoustic Source Identification for Transitional Airfoil Flows Using Cross Correlations. Lloyd E. Jones, Neil D. Sandham, and Richard D. Sandberg, *University of Southampton*, Great Britain (**48**, 10, p. 2299) Article

J10-210 High-Resolution Simulation of Parallel Blade–Vortex Interactions. Alasdair Thom, *University of Glasgow*, Great Britain; and Karthikeyan Duraisamy, *Stanford University* (**48**, 10, p. 2313) Article

J10-211 Large Eddy Simulation of Stable Supersonic Jet Impinging on Flat Plate. A. Dauptain, B. Cuenot, and L. Y. Gicquel, *Centre Européen de Recherche et de Formation Avancées en Calcul Scientifique*, France (**48**, 10, p. 2325) Article

J10-212 Nonlinear Model Reduction of von Kármán Plates Under Quasi-Steady Fluid Flow. M. R. Brake and D. J. Segalman, *Sandia National Laboratories* (**48**, 10, p. 2339) Article

J10-213 Comparison of Nonreflecting Outlet Boundary Conditions for Compressible Solvers on Unstructured Grids. Victor Granet, Olivier Vermorel, Thomas Léonard, and Laurent Gicquel, *Centre Européen de Recherche et de Formation Avancée en Calcul Scientifique*, France; and Thierry Poinsot, *Institut de Mécanique des Fluides de Toulouse*, France (**48**, 10, p. 2348) Article

J10-214 Implicit High-Order Spectral Finite Volume Method for Inviscid Compressible Flows. Carlos Brevigliери, *Instituto Tecnológico de Aeronáutica*, Brazil; João L. Azevedo and Edson Basso, *Instituto de Aeronáutica e Espaço*, Brazil; and Maximiiiano A. Souza, *Instituto Tecnológico de Aeronáutica*, Brazil (**48**, 10, p. 2365) Article based on AIAA Paper 2009-4119

J10-215 Simple Technique for Precise Measurement of Transmission Loss of Planar Sound Waves. Koichi Mori, Yoshiki Murahashi, Yutaka Koga, and Yoshiaki Nakamura, *Nagoya University*, Japan; M. K. Ibrahim, *Cairo University*, Egypt; and Takashi Takahashi, *Japan Aerospace Exploration Agency*, Japan (**48**, 10, p. 2377) Article

J10-216 High-Bandwidth Pulsed Microactuators for High-Speed Flow Control. John T. Solomon, Rajan Kumar, and Farrukh S. Alvi, *Florida A&M University and Florida State University* (**48**, 10, p. 2386) Article based on AIAA Paper 2008-3042

J10-217 Surface-Pressure Fluctuations from Separated Flow over an Axisymmetric Bump. Gwibo Byun and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**48**, 10, p. 2397) Article based on AIAA Paper 2010-0007

J10-218 Efficient Hessian Calculations Using Automatic Differentiation and the Adjoint Method with Applications. Markus P. Rumpfkeil and Dimitri J. Mavriplis, *University of Wyoming* (**48**, 10, p. 2406) Article based on AIAA Paper 2010-1268

J10-219 Reduced-Order Nonlinear Unsteady Aerodynamic Modeling Using a Surrogate-Based Recurrence Framework. Bryan Glaz, Li Liu, and Peretz P. Friedmann, *University of Michigan* (**48**, 10, p. 2418) Article

J10-220 Gust Response for Flexibly Suspended High-Aspect Ratio Wings. Deman Tang, Adam Grasch, and Earl H. Dowell, *Duke University* (**48**, 10, p. 2430) Article

J10-221 Beamformed Flow-Acoustic Correlations in a Supersonic Jet. Dimitri Papamoschou, *University of California, Irvine*; Philip J. Morris and Dennis K. McLaughlin, *Pennsylvania State University* (**48**, 10, p. 2445) Article based on AIAA Paper 2009-3212

J10-222 Experimental Investigation on Aerodynamic Performance of Gliding Butterflies. Ye Hu and Jinjun Wang, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 10, p. 2454) Technical Note

J10-223 Yaw Angle Effect on Flow Structure over the Nonslender Diamond Wing. S. Yayla, C. Canpolat, B. Sahin, and H. Akilli, *Çukurova University*, Turkey (**48**, 10, p. 2457) Technical Note

J10-224 Experimental Investigation of a High-Lift Low-Pressure Turbine Suction Surface. Mark McQuilling and Mitch Wolff, *Wright State University*; Sergey Fonov and Jim Crafton, *Innovative Scientific Solutions*; and Rolf Sondergaard, *U.S. Air Force Research Laboratory* (**48**, 11, p. 2465) Article based on AIAA Paper 2008-0079

J10-225 Harmonic-Balance-Based Code-Coupling Algorithm for Aeroelastic Systems Subjected to Forced Excitation. F. Blanc, *Airbus, S.A.S.*, France; F.-X. Roux, *ONERA*, France; and J.-C. Jouhaud, *Centre Européen de Recherche et de Formation Avancée en Calcul Scientifique*, France (**48**, 11, p. 2472) Article

J10-226 Transient Separation Control Using Pulse-Combustion Actuation. Daniel P. Brzozowski, George T. Woo, John R. Culp, and Ari Glezer, *Georgia Institute of Technology* (**48**, 11, p. 2482) Article based on AIAA Paper 2006-3024

J10-227 Klebanoff-Mode Modeling and Bypass-Transition Prediction. O. Vermeersch and D. Arnal, *ONERA*, France (**48**, 11, p. 2491) Article based on AIAA Paper 2009-3807

J10-228 Meshless Scheme Based on Alignment Constraints. Aaron Katz and Antony Jameson, *Stanford University* (**48**, 11, p. 2501) Article based on AIAA Paper 2009-3534

J10-229 Patched Characteristic Interface Condition for High-Order Multiblock Aeroacoustic Computation. Edward Peers, Xin Zhang, and Jae W. Kim, *University of Southampton*, Great Britain (**48**, 11, p. 2512) Article based on AIAA Paper 2009-3112

J10-230 Analytical Solution of Converging Shock Wave in Magnetogasdynamics. L. P. Singh and M. Singh, *Banaras Hindu University*, India; and Bishun D. Pandey, *Ohio State University* (**48**, 11, p. 2523) Article

J10-231 Microramp Flow Control of Normal Shock/Boundary-Layer Interactions. Thomas Herges, Erik Kroeker, Greg Elliott, and Craig Dutton, *University of Illinois at Urbana-Champaign* (**48**, 11, p. 2529) Article based on AIAA Paper 2009-0920

J10-232 Far-Field Analysis of the Aerodynamic Force by Lamb Vector Integrals. C. Marongiu, *Centro Italiano Ricerche Aerospaziali*, Italy; and R. Tognaccini, *Università di Napoli "Federico II,"* Italy (**48**, 11, p. 2543) Article

J10-233 Component Synthesis Method for Transient Response of Nonproportionally Damped Structures. M. H. Liu, *Harbin Institute of Technology*, China (PRC); and G. T. Zheng, *Tsinghua University*, China (PRC) (**48**, 11, p. 2556) Article

J10-234 Induced-Drag Minimization of Nonplanar Geometries Based on the Euler Equations. Jason E. Hicken and David W. Zingg, *University of Toronto*, Canada (**48**, 11, p. 2564) Article based on AIAA Paper 2008-5807

J10-235 Experimental and Computational Study of Nonreacting Vortex Breakdown in a Swirl-Stabilized Combustor. Chukwueloka O. Umeh, *General Electric Aviation*; Zvi Rusak, *Rensselaer Polytechnic Institute*; Ephraim Gutmark and Rodrigo Villalva, *University of Cincinnati*; and Dong-Jin Cha, *Hanbat National University*, (ROK) (**48**, 11, p. 2576) Article based on AIAA Paper 2009-0643

J10-236 Improved Algorithm for Nonlinear Sound Propagation with Aircraft and Helicopter Noise Applications. Seongkyu Lee, Philip J. Morris, and Kenneth S. Brentner, *Pennsylvania State University* (**48**, 11, p. 2586) Article based on AIAA Paper 2010-1384

J10-237 Large Eddy Simulation and Experimental Study of a Controlled Coaxial Liquid-Air Jet. Nicolas Guézennec and Thierry Poinsot, *Institut de Mécanique des Fluides de Toulouse*, France (**48**, 11, p. 2596) Article

J10-238 Effect of Small-Scale Output Unsteadiness on Adjoint-Based Sensitivity. Joshua A. Krakos and David L. Darmofal, *Massachusetts Institute of Technology* (**48**, 11, p. 2611) Article based on AIAA Paper 2009-4274

J10-239 Error Estimation and Error Reduction in Separable Monte-Carlo Method. Bharani Ravishankar, Benjamin P. Smarslok, Raphael T. Haftka, and Bhavani V. Sankar, *University of Florida* (**48**, 11, p. 2624) Article based on AIAA Paper 2009-2266

J10-240 Flexible Boundary Method in Dynamic Substructure Techniques Including Different Component Damping. Stefan Dieker, Germany; Kiyoumars Abdoly and Andreas Rittweger, *EADS Astrium, GmbH*, Germany (**48**, 11, p. 2631) Article

J10-241 Hybrid Grid Generation Method for Complex Geometries. Hong Luo and Seth Spiegel, *North Carolina State University*; and Rainald Löhner, *George Mason University* (**48**, 11, p. 2639) Article based on AIAA Paper 2008-531

J10-242 Structural and Aerodynamic Models in Nonlinear Flight Dynamics of Very Flexible Aircraft. Rafael Palacios, Joseba Murua, and Robert Cook, *Imperial College London*, Great Britain (**48**, 11, p. 2648) Article based on AIAA Paper 2009-2403

J10-243 Direct Numerical Simulation of Discrete Roughness on a Swept-Wing Leading Edge. Donald P. Rizzetta and Miguel R. Visbal, *U.S. Air Force Research Laboratory*; Helen L. Reed and William S. Saric, *Texas A&M University* (**48**, 11, p. 2660) Article based on AIAA Paper 2010-377

J10-244 Broadband Noise Due to Rotor-Wake/Rotor Interaction in Contra-Rotating Open Rotors. Vincent P. Blandeau and Phillip F. Joseph, *University of Southampton*, Great Britain (**48**, 11, p. 2674) Article

J10-245 Mass Flux Sensing via Tunable Diode Laser Absorption of Water Vapor. Leyen S. Chang, Jay B. Jeffries, and Ronald K. Hanson, *Stanford University* (**48**, 11, p. 2687) Article based on AIAA Paper 2010-303

J10-246 Aerodynamic Performance of Cambered Heaving Airfoils. Joel E. Guerrero, *University of Genoa*, Italy (**48**, 11, p. 2694) Technical Note

J10-247 Modification of Ninth-Order Weighted Essentially Non-oscillatory Scheme for Mixed Subsonic/Supersonic Flow. A. Gross and H. F. Fasel, *University of Arizona* (**48**, 11, p. 2698) Technical Note

J10-248 Observer for Phased Microphone Array Signal Processing with Nonlinear Output. Xun Huang, Igor Vinogradov, Long Bai, and Jianchao Ji, *Peking University*, China (PRC) (**48**, 11, p. 2702) Technical Note

J10-249 Proposed Boundary Conditions for Gust–Airfoil Interaction Noise. Jae W. Kim, Alex S. Lau, and Neil D. Sandham, *University of Southampton*, Great Britain (**48**, 11, p. 2705) Technical Note based on AIAA Paper 2010-0839

J10-250 How Does a Gurney Flap Enhance the Aerodynamics Forces?. Yang-Yao Niu and Ting-Shiu Hsu, *Chung-Hua University*, Taiwan (ROC); C. T. Hsieh, C. C. Chang, and C. C. Chu, *National Taiwan University*, Taiwan (ROC) (**48**, 11, p. 2710) Technical Note

J10-251 Combined Plasma and Gurney Flap Flow Control at Low Flight Reynolds Numbers. Chan Y. Schuele, *Technical University of Berlin*, Germany; and David Greenblatt, *Technion–Israel Institute of Technology*, Israel (**48**, 11, p. 2714) Technical Note

J10-252 Point-Collocation Nonintrusive Polynomial Chaos Method for Stochastic Computational Fluid Dynamics. Serhat Hosder, *Missouri University of Science and Technology*; Robert W. Walters and Michael Balch, *Virginia Polytechnic Institute and State University* (**48**, 12, p. 2721) Article

J10-253 Blockage Effects on the Aerodynamics of a Pitching Wing. Yongsheng Lian, *University of Louisville* (**48**, 12, p. 2731) Article

J10-254 Buckling and Static Analysis of Curvilinearly Stiffened Plates Using Mesh-Free Method. Ali Yeilaghi Tamijani and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University* (**48**, 12, p. 2739) Article based on AIAA Paper 2009-2454

J10-255 Least-Squares Continuous Sensitivity Shape Optimization for Structural Elasticity Applications. Douglas P. Wickert, *Air Force Institute of Technology*; Robert A. Canfield, *Virginia Polytechnic Institute and State University*; and J. N. Reddy, *Texas A&M University* (**48**, 12, p. 2752) Article based on AIAA Paper 2008-1797

J10-256 Shock-Water Column Interaction, from Initial Impact to Fragmentation Onset. Dan Igra, *Rafael*, Israel; and Mingyu Sun, *Tohoku University*, Japan (**48**, 12, p. 2763) Article

J10-257 Acoustic Scattering in the Time Domain Using an Equivalent Source Method. Seongkyu Lee, Kenneth S. Brentner, and Philip J. Morris, *Pennsylvania State University* (**48**, 12, p. 2772) Article based on AIAA Paper 2009-3177

J10-258 High-Order Numerical Method for Magnetohydrodynamic Control of Shock-Induced Separation. John (Ioannnis) A. Ekaterinaris, *University of Patras*, Greece (**48**, 12, p. 2781) Article based on AIAA Paper 4151-2009

J10-259 Large-Eddy Simulation of Plasma-Based Turbulent Boundary-Layer Separation Control. Donald P. Rizzetta and Miguel R. Visbal, *U.S. Air Force Research Laboratory* (**48**, 12, p. 2793) Article based on AIAA Paper 2009-4287

J10-260 Supersonic Drag Reduction with Repetitive Laser Pulses Through a Blunt Body. Akihiro Sasoh, Yohei Sekiya, Takeharu Sakai, Jae-Hyung Kim, and Atsushi Matsuda, *Nagoya University*, Japan (**48**, 12, p. 2811) Article based on AIAA Paper 2009-3585

J10-261 Compressibility Effects on Boundary-Layer Transition Induced by an Isolated Roughness Element. John A. Redford, Neil D. Sandham, and Graham T. Roberts, *University of Southampton*, Great Britain (**48**, 12, p. 2818) Article

J10-262 Influence of Reynolds Number on Vortex Flow over a Non-Slender Delta Wing. Lan Chen, Jinjun Wang, Lin-xian Zuo, and Li-hao Feng, *Beijing University of Aeronautics and Astronautics*, China (PRC) (**48**, 12, p. 2831) Article

J10-263 Extending Weighted Compact Nonlinear Schemes to Complex Grids with Characteristic-Based Interface Conditions. Xiaogang Deng, Meiliang Mao, Guohua Tu, Yifeng Zhang, and Hanxin Zhang, *State Key Laboratory of Aerodynamics*, China (PRC) (**48**, 12, p. 2840) Article

J10-264 Guidelines and Recommendations to Construct Theories for Metallic and Composite Plates. E. Carrera and M. Petrolo, *Politecnico di Torino*, Italy (**48**, 12, p. 2852) Article

J10-265 Adjoint Sensitivity Formulation for Discontinuous Galerkin Discretizations in Unsteady Inviscid Flow Problems. Li Wang, *University of Tennessee at Chattanooga*; Dimitri J. Mavriplis, *University of Wyoming*; and W. K. Anderson, *University of Tennessee at Chattanooga* (**48**, 12, p. 2867) Article based on AIAA Paper 2010-367

J10-266 High-Lift Airfoil Separation with Dielectric Barrier Discharge Plasma Actuation. Jesse Little, *University of Arizona*; and Mo Samimy, *Ohio State University* (**48**, 12, p. 2884) Article based on AIAA Paper 2010-1088

J10-267 Validation of a Zonal Approach Computing the Sound Radiation from Lined Ducts. Clemens Buske, *DLR, German Aerospace Center*, Germany; Christophe Richter and Frank Thiele, *Technische Universität Berlin*, Germany; Chao Yu, *PPG Industries*; and Mei Zhuang, *Ohio State University* (**48**, 12, p. 2899) Article based on AIAA Paper 2009-3169

J10-268 Numerical Study of Flexible Flapping Wing Propulsion. Tao Yang and Mingjun Wei, *New Mexico State University*; and Hong Zhao, *University of Illinois at Urbana-Champaign* (**48**, 12, p. 2909) Article based on AIAA Paper 2010-553

J10-269 Aerodynamics of a Supersonic Projectile in Proximity to a Solid Surface. Graham Doig, Tracie J. Barber, and Eddie Leonardi, *University of New South Wales*, Australia; Andrew J. Neely and Harald Kleine, *University of New South Wales, Australian Defence Force Academy*, Australia (**48**, 12, p. 2916) Article

J10-270 Prediction of Broadband Shock-Associated Noise Using Reynolds-Averaged Navier–Stokes Computational Fluid Dynamics. Philip J. Morris, *Pennsylvania State University*; and Steven A. E. Miller, *NASA Langley Research Center* (**48**, 12, p. 2931) Article based on AIAA Paper 2009-3315

J10-271 Analytical Investigation of the Toughening Potential of a Failure Tailoring Concept. Robert A. Haynes, *Georgia Institute of Technology*; D. Stefan Dancila and Erian A. Armanios, *University of Texas at Arlington* (**48**, 12, p. 2945) Article

J10-272 New Families of Hygrothermally Stable Composite Laminates with Optimal Extension-Twist Coupling. Robert A. Haynes, *Georgia Institute of Technology*; and Erian A. Armanios, *University of Texas at Arlington* (**48**, 12, p. 2954) Article based on AIAA Paper 2010-2773

J10-273 Comparing Pure-Pitch and Pure-Plunge Kinematics for a Symmetric Airfoil. Sunetra Sarkar, *Indian Institute of Technology Madras*, India (**48**, 12, p. 2962) Article based on AIAA Paper 2009-3815

J10-274 Stability of Gliding Flight of a Swallowtail Butterfly. Makoto Okamoto, Shigeru Sunada, and Hiroshi Tokutake, *Osaka Prefecture University*, Japan (**48**, 12, p. 2970) Technical Note

J10-275 Expression for Supersonic Fluctuating Drag Force Magnitude due to Ambient Thermodynamic Disturbances. Lawrence J. DeChant, *Sandia National Laboratories* (**48**, 12, p. 2976) Technical Note

J10-276 Plasma Catalysis for Enhanced-Thrust Single Dielectric Barrier Discharge Plasma Actuators. Neal E. Fine, *Applied Science Products, Inc.*; and Steven J. Brickner, *S. J. Brickner Consulting, LLC* (**48**, 12, p. 2979) Technical Note

Books Reviewed During 2010

The Scramjet Engine, Processes and Characteristics, by Segal, Corin (**48**, 9, p. 2173); reviewed by Anthony Castrogiovanni, *ACENT Laboratories, LLC*

Hermann Schlichting—100 Years, edited by Radespiel, Rolf, Rossow, Cord-Christian, and Winfried Brinkmann, Benjamin (**48**, 10, p. 2462); reviewed by Peter Bradshaw, *Stanford University*

The Mechanics and Thermodynamics of Continua, by Gurtin, M. E., Fried, E, and Anand, L. (**48**, 11, p. 2719); reviewed by William S. Slaughter, *University of Pittsburgh*

Fundamentals of Aerodynamics, by Anderson, John D., Jr. (**48**, 12, p. 2983); reviewed by C. K. Madnia, *University at Buffalo, State University of New York*
